SENIOR DESIGNER

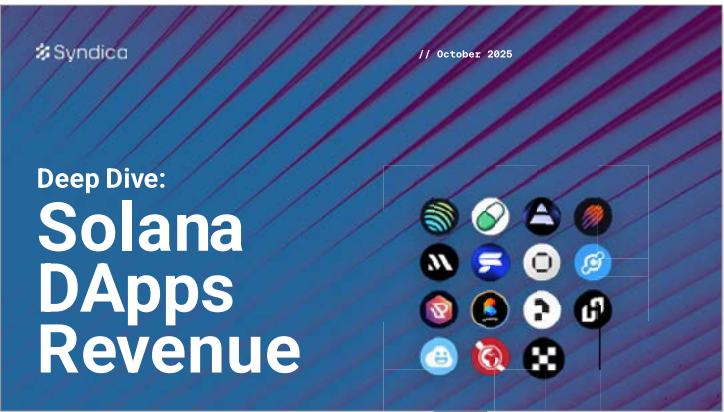

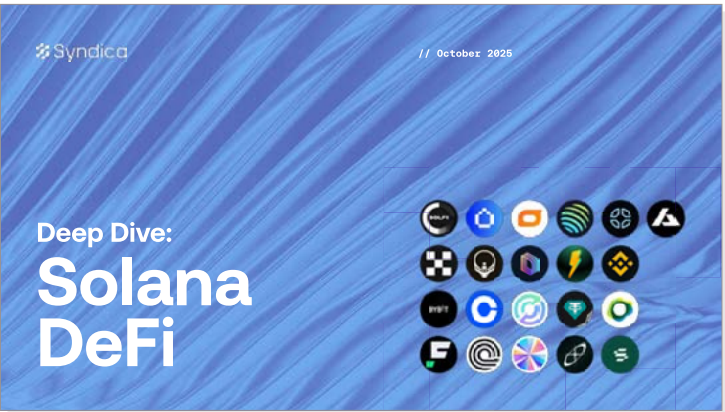

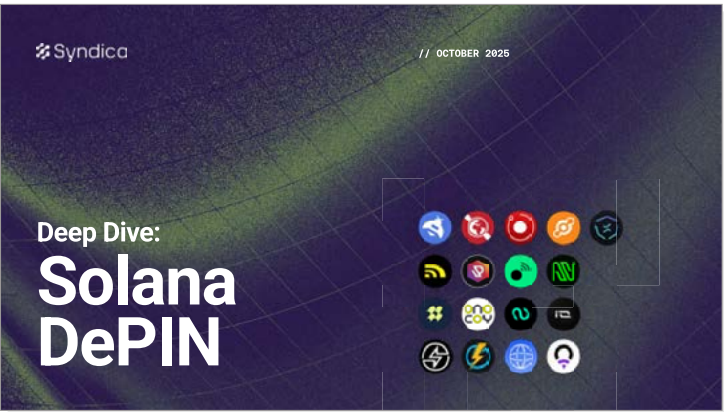

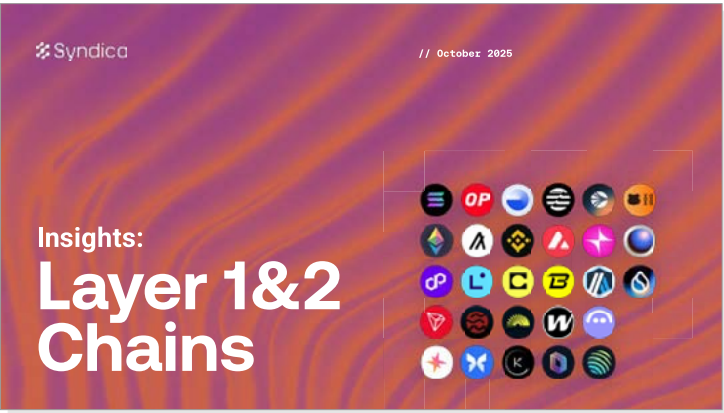

Syndica

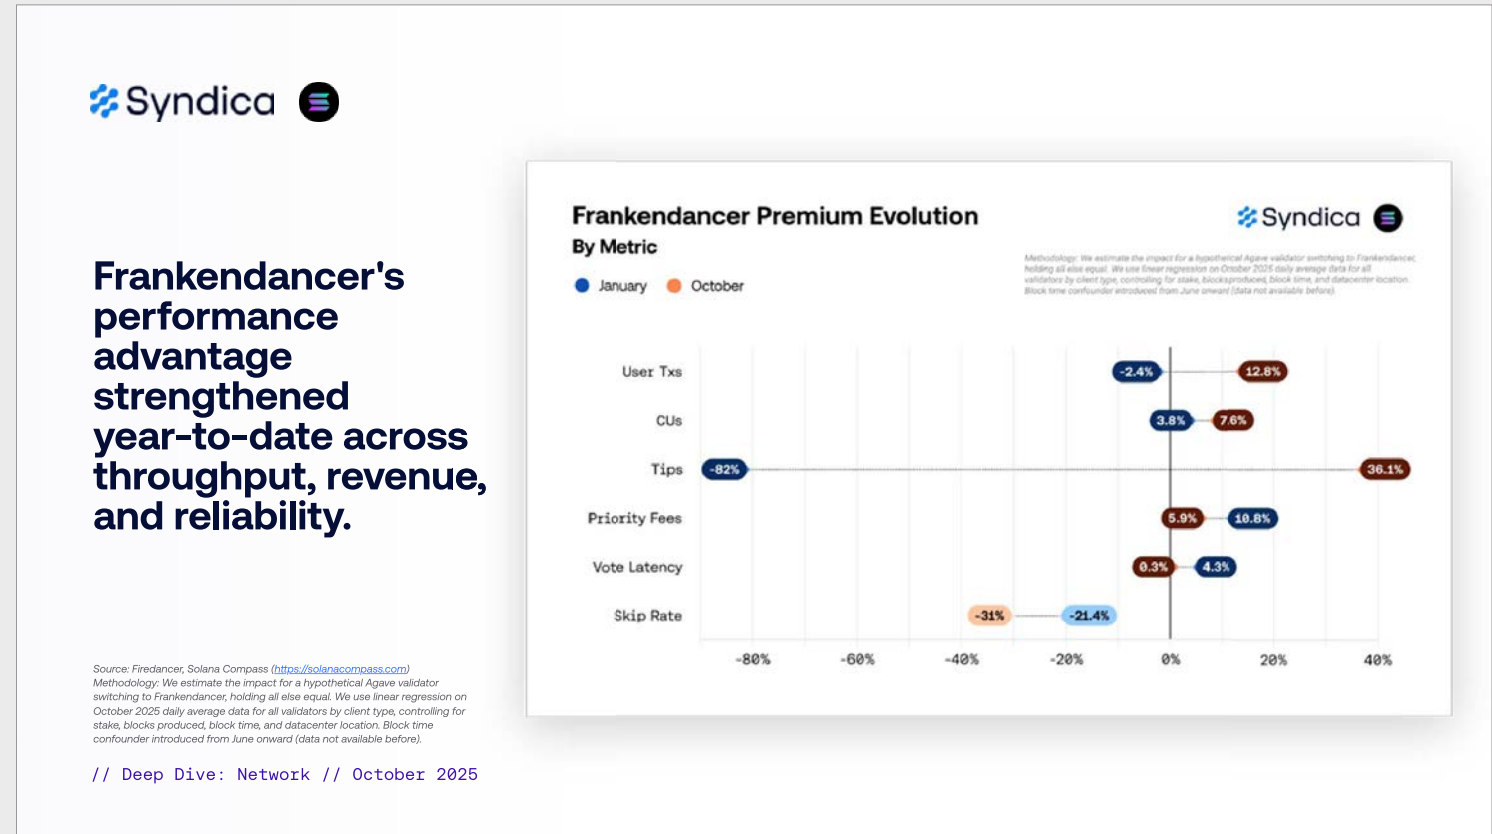

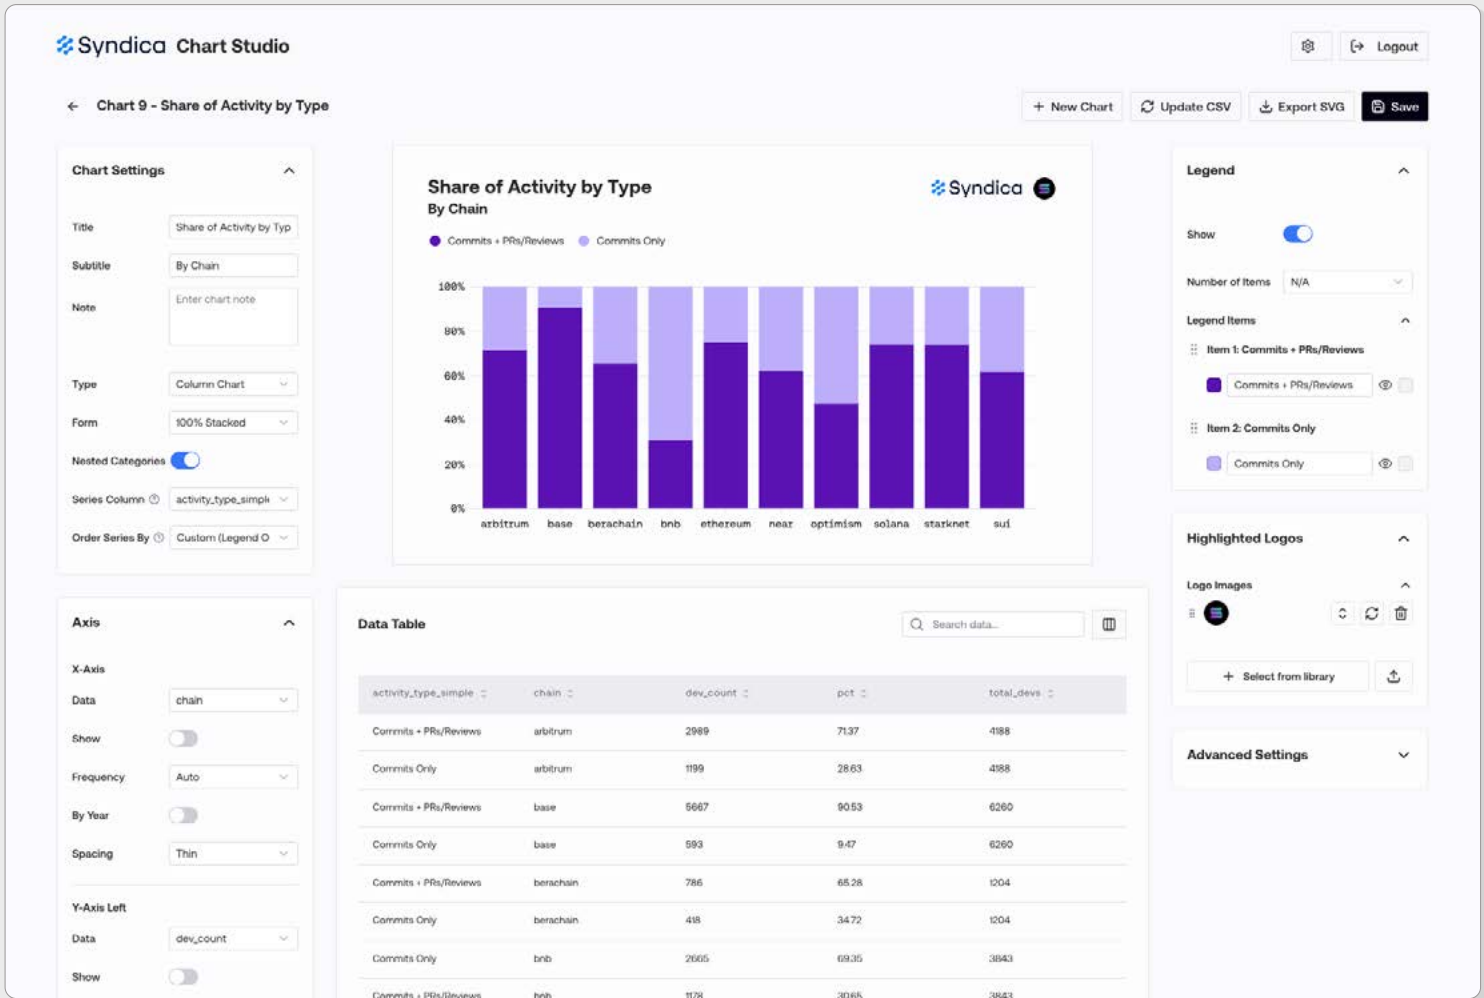

Product = Primary Brand Colours + Tech Graphic

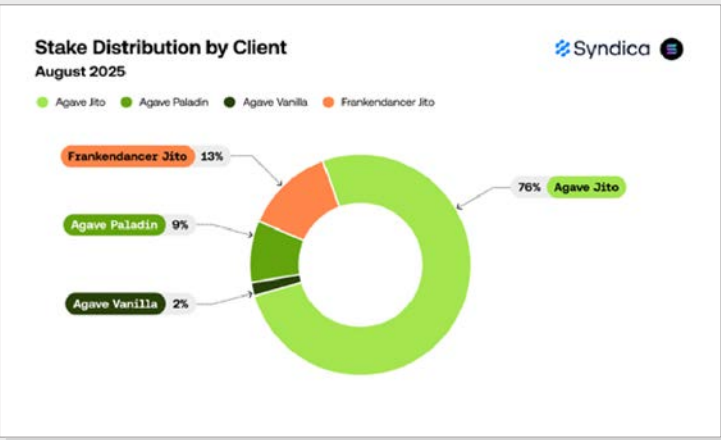

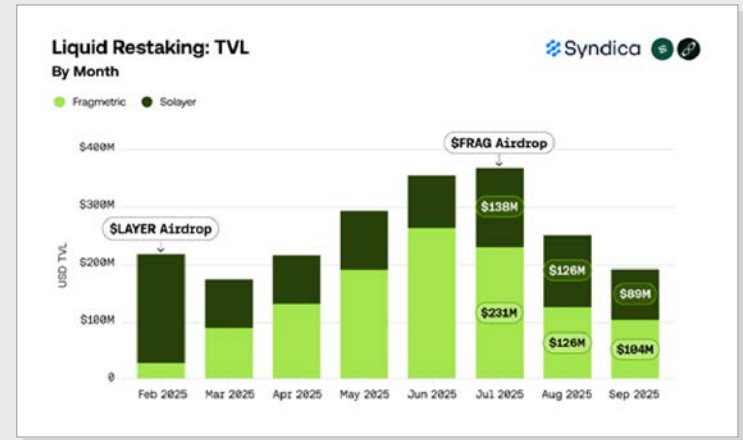

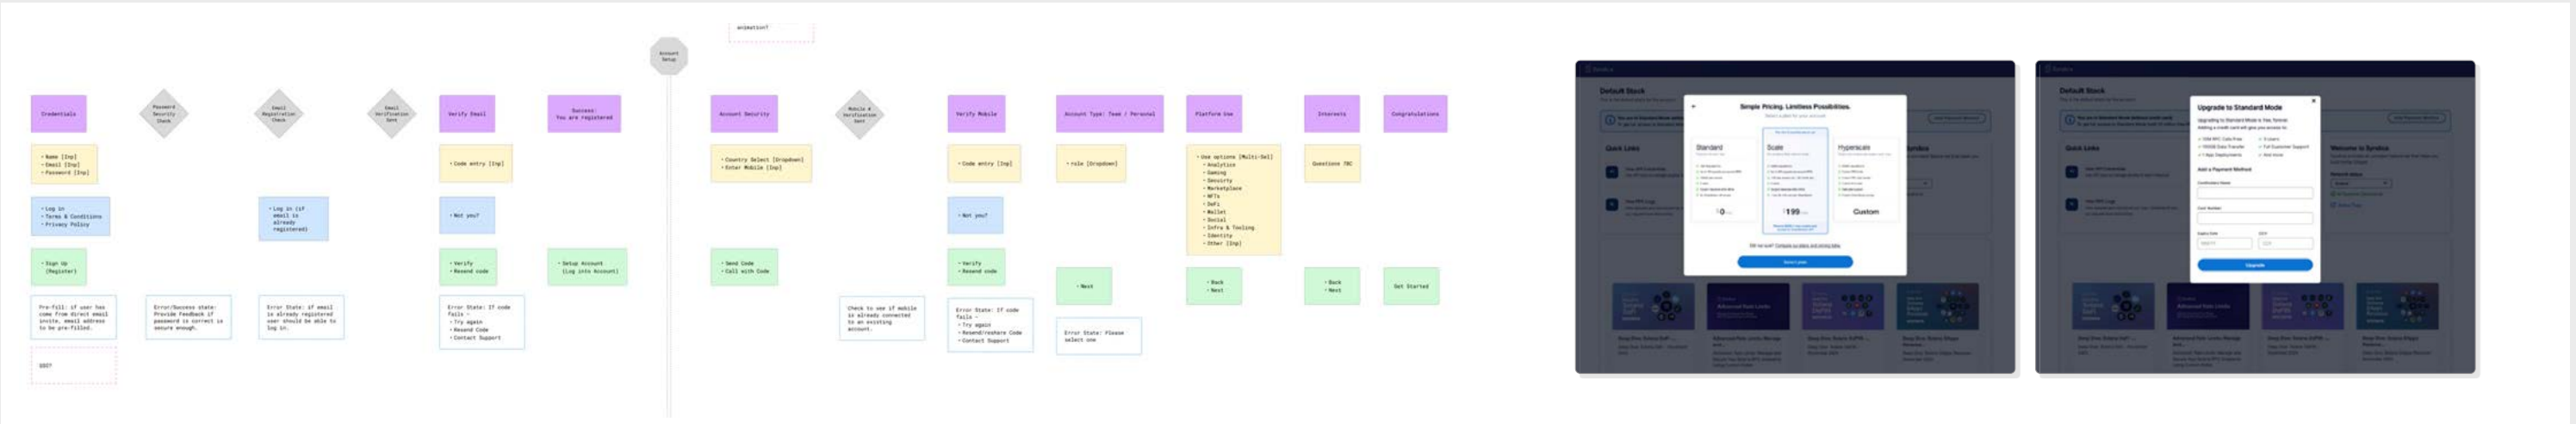

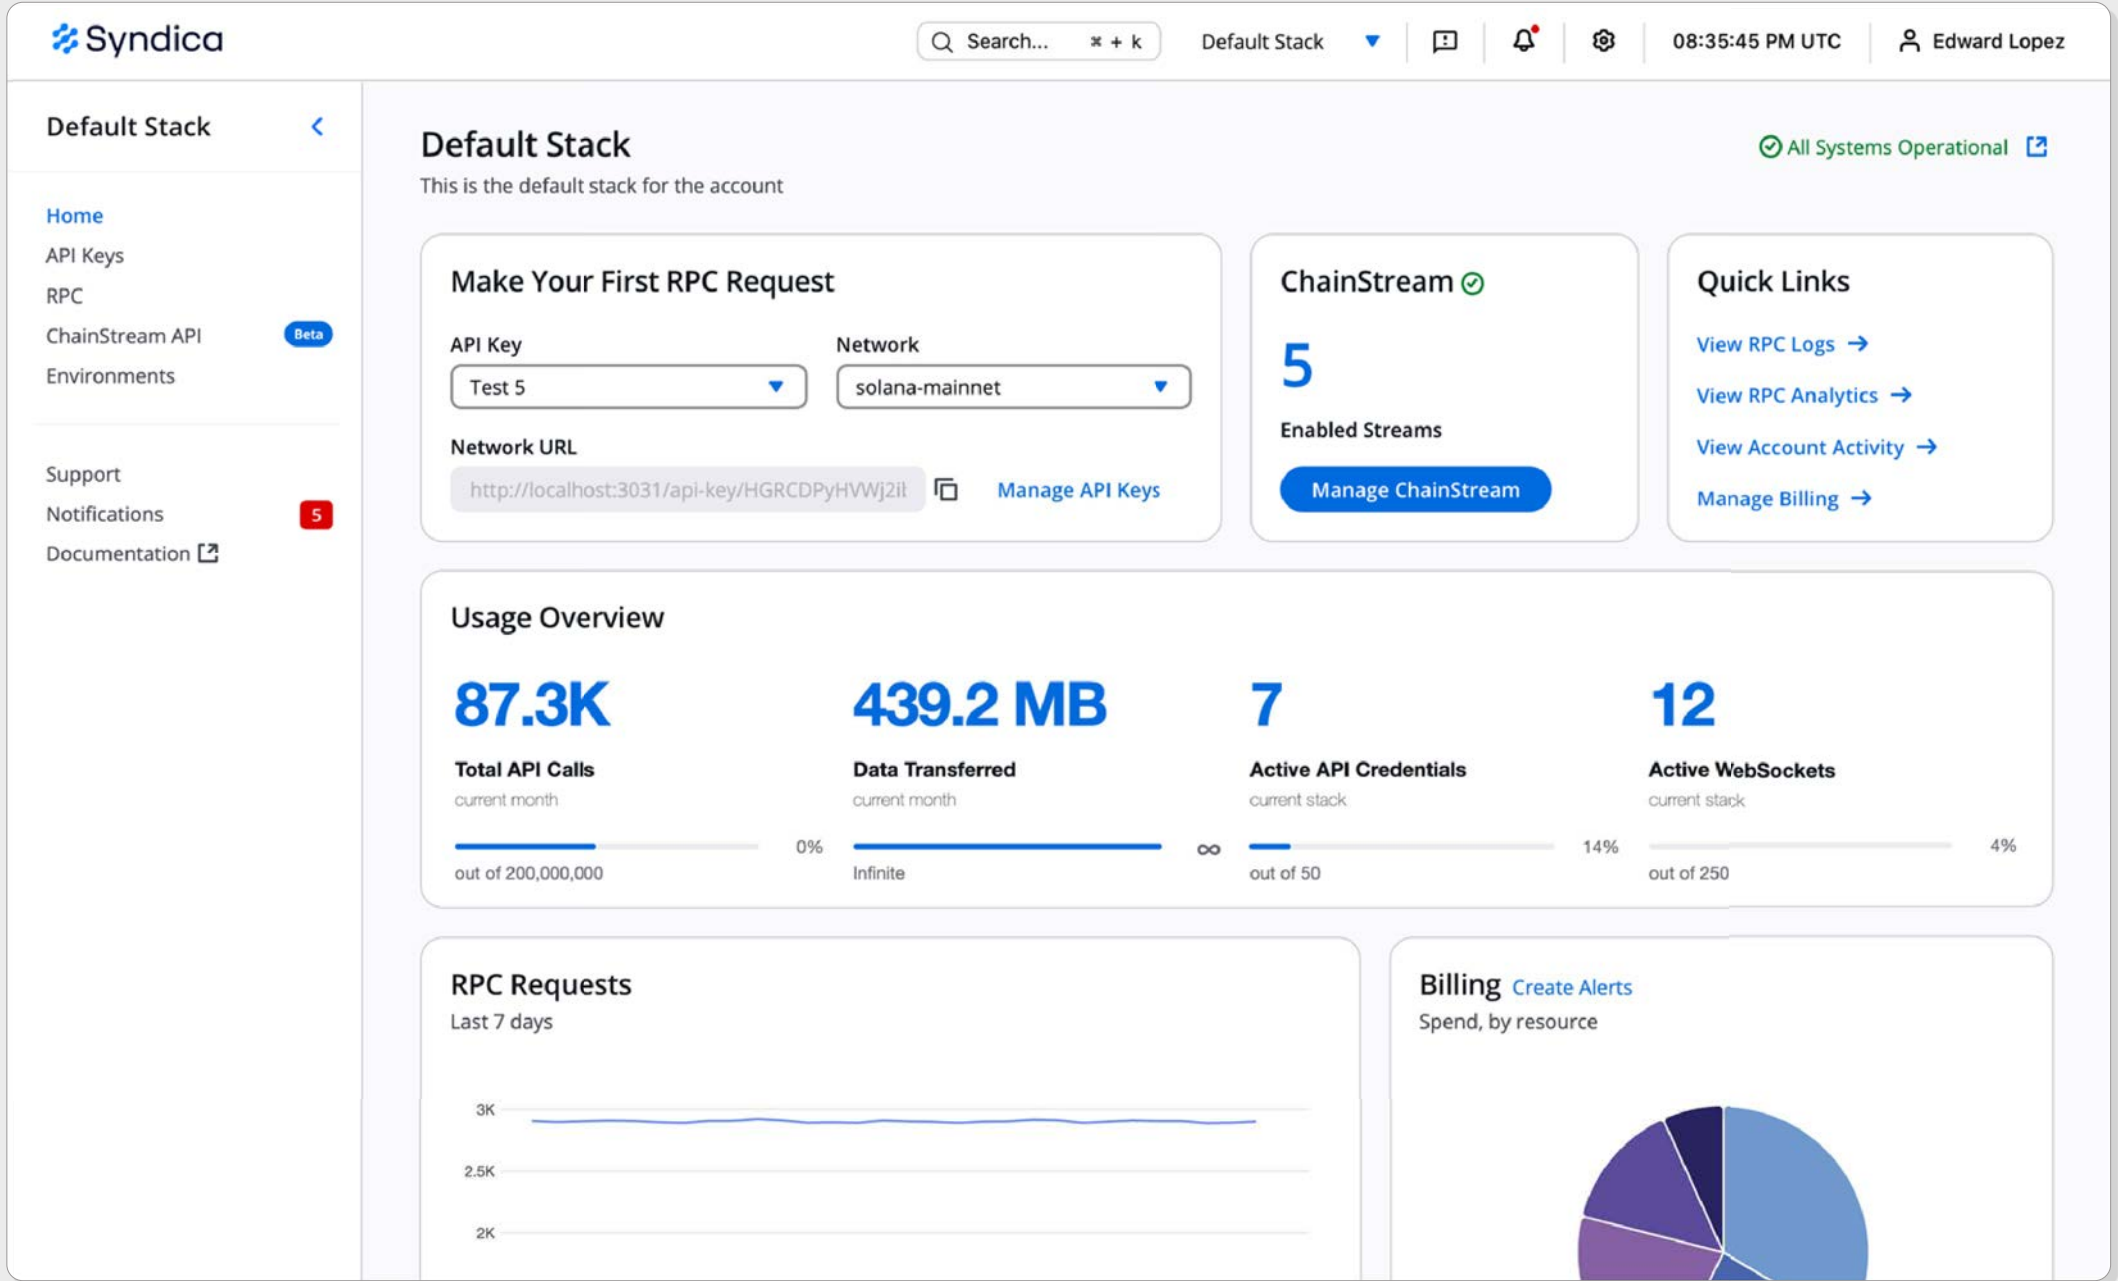

Research = Secondary Brand Colours + Featured Companies

Custom-made chart builder using AI.
Made to the specifications of the
research charts and brand guidelines

Suports multiple users. Global save states.
12+ chart types, 100+ CSV & visual settings.
Chart production time 30min → 5min

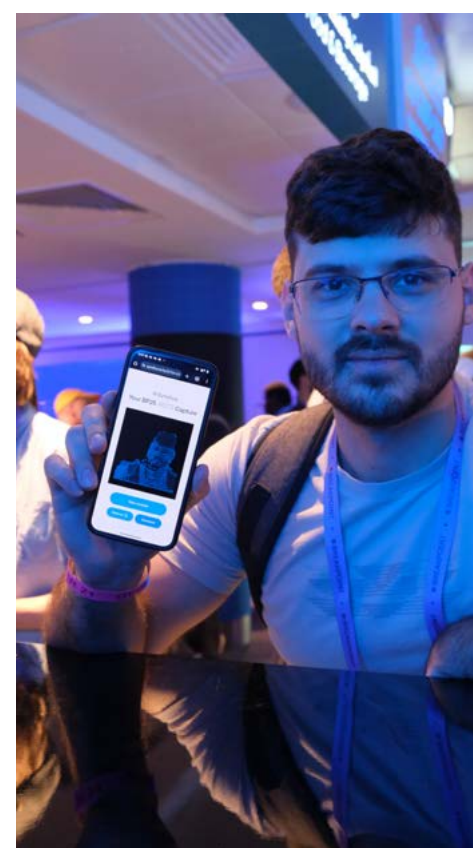

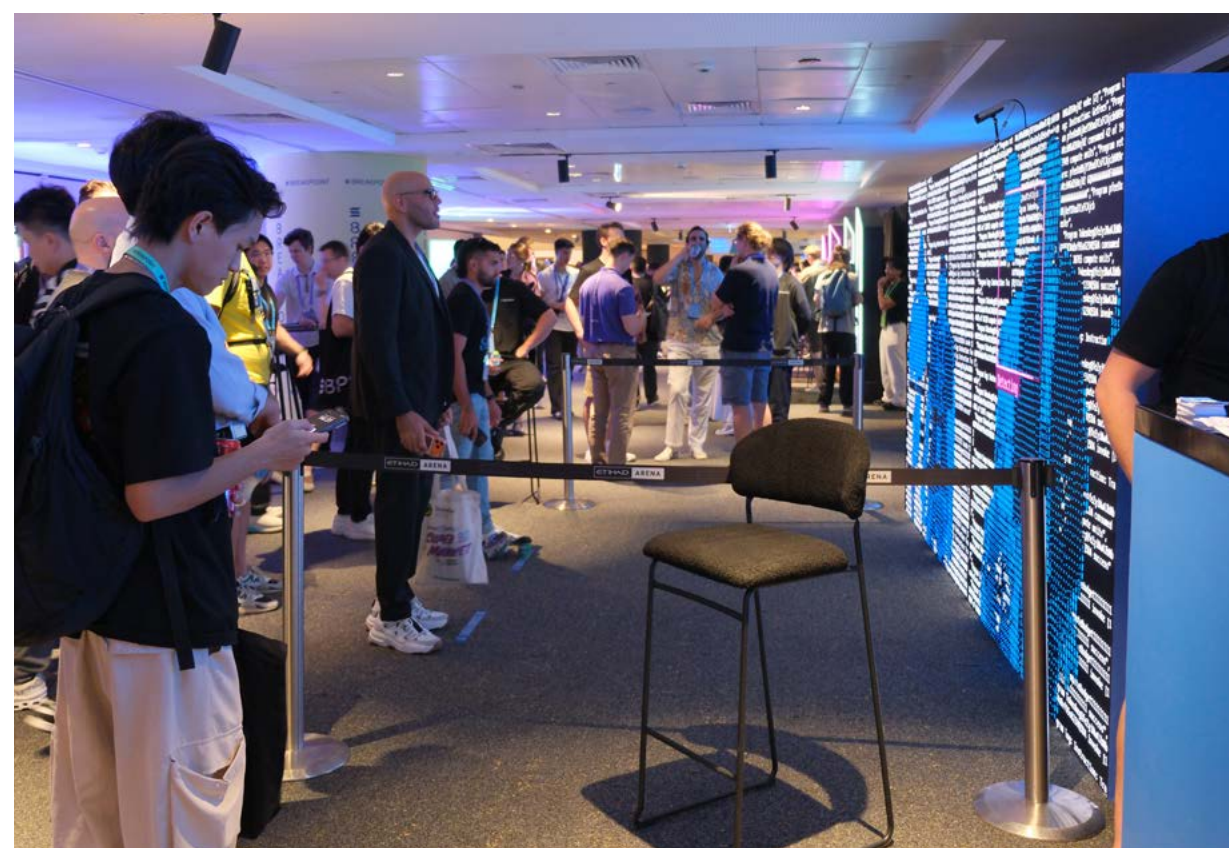

How do you design consistent brand activations at Solana's biggest conference as a headline sponsor with limited time and resources?

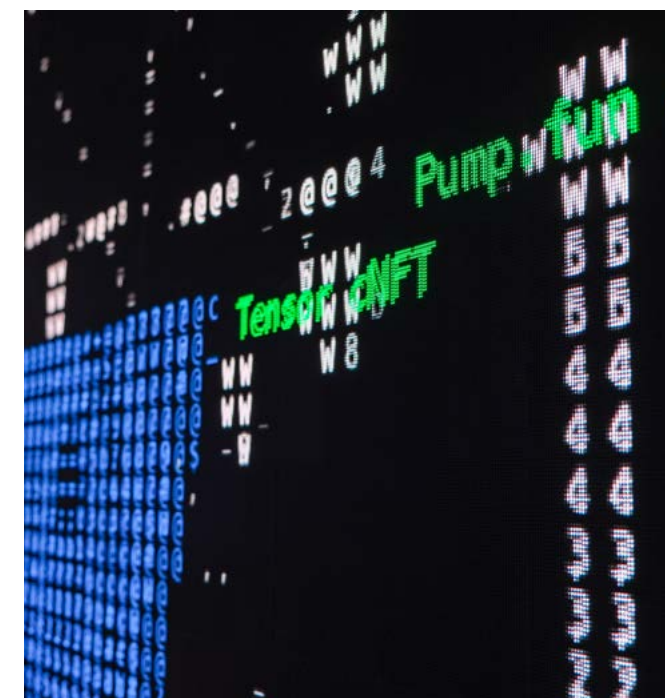

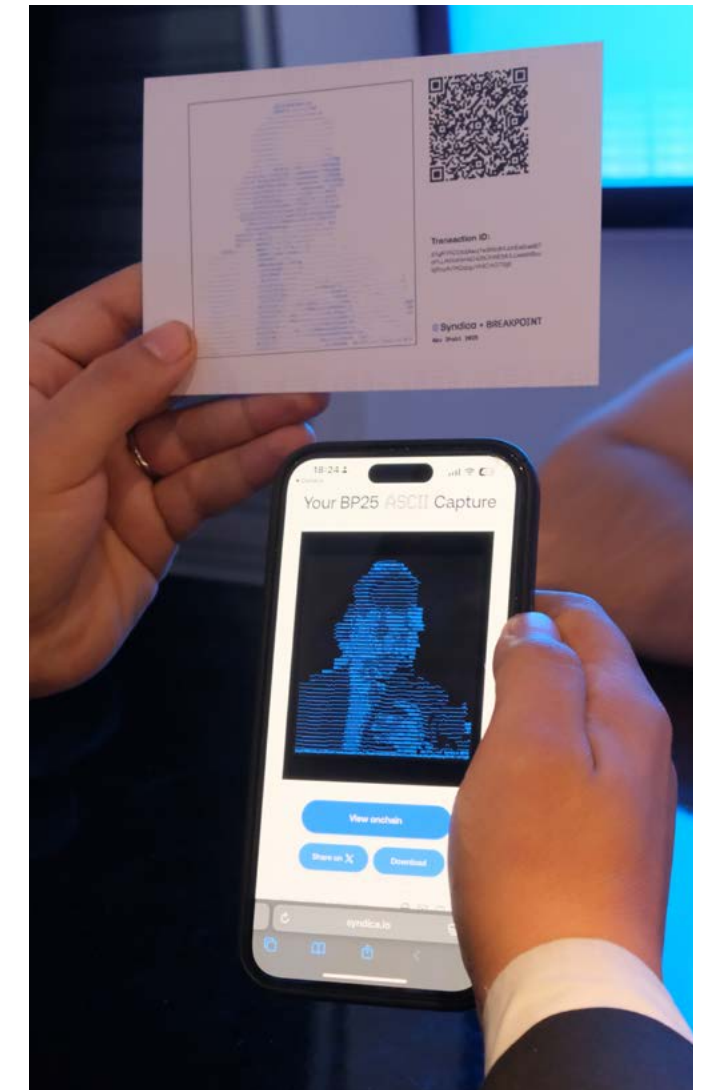

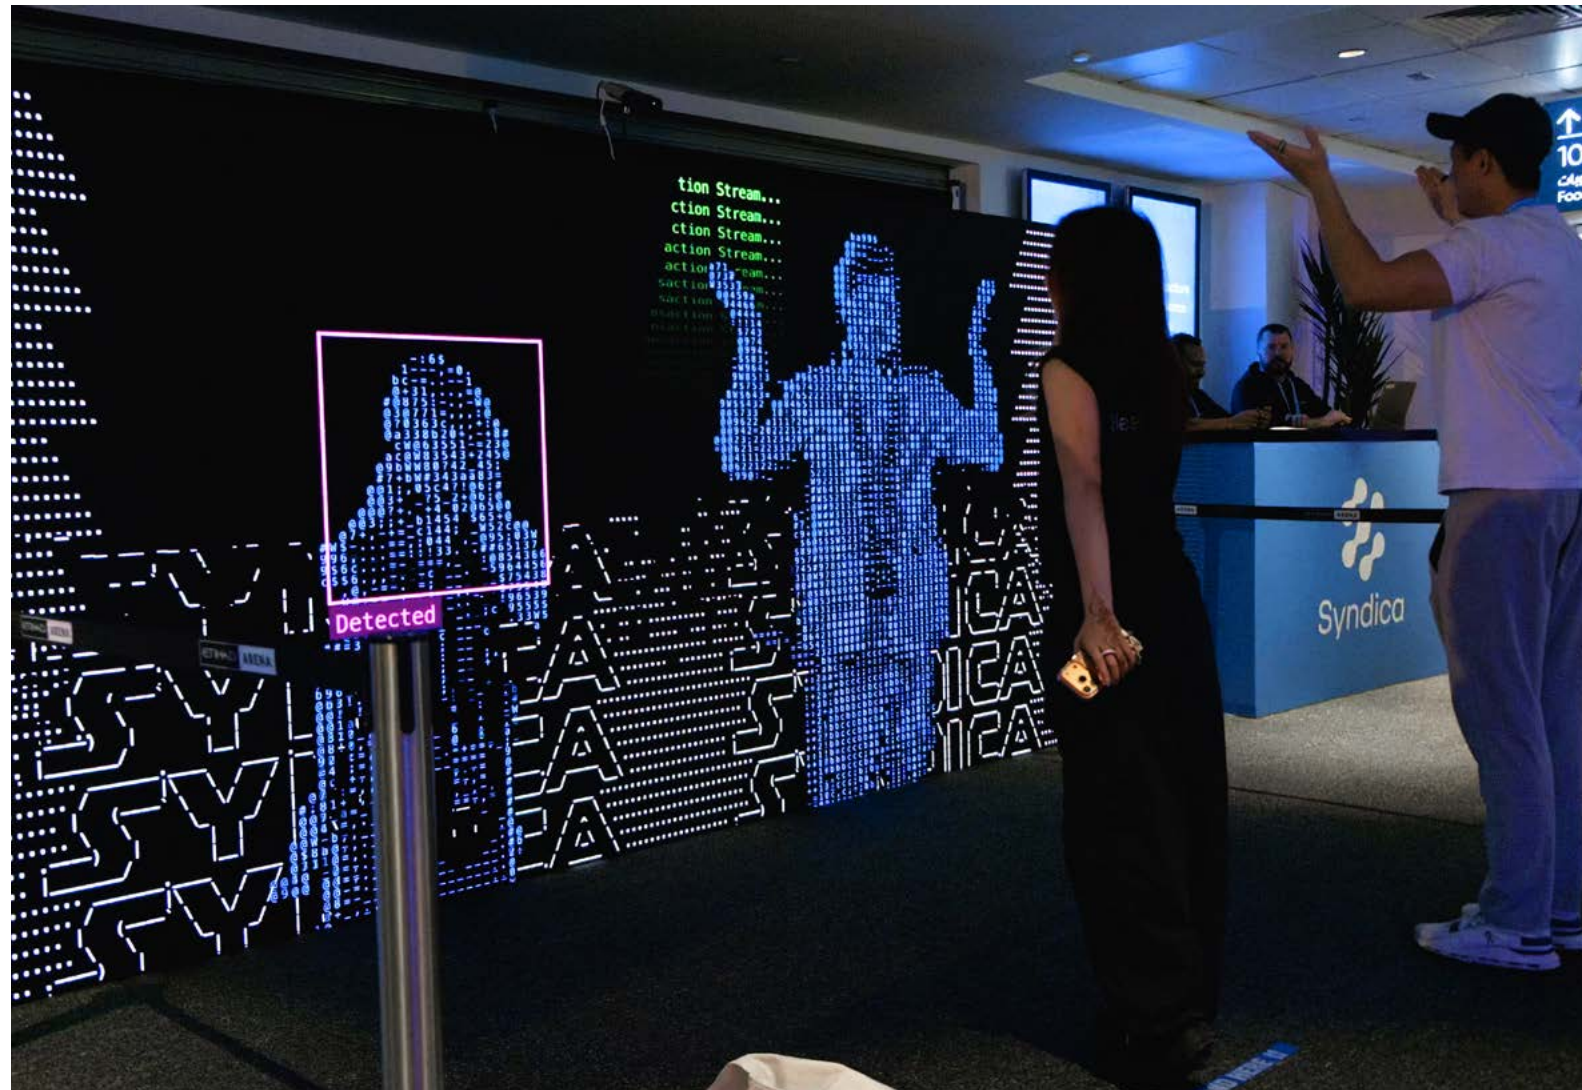

CLIENT:
SYNDICA

PROJECT:
WEB3 INFRASTRUCTURE - BREAKPOINT 2025

ROLE:
SENIOR DESIGNER

Digital interactive ASCII art with live data. ASCII facial capture, storage, and share. Supporting micro-site. Hero video position. Logo animation on entry. Booth Graphics with dual screens. Standee banners. Branded merch.

- Visitors approach the screen
- They are detected by motion cameras
- Their image is shaded on screen in ASCII
- Face detection triggers a capture window
- Capture countdown & ASCII image save
- Stored on blockchain & hosted on micro-site
- Downloadable via QR Code or micro-site
- Optional printed card

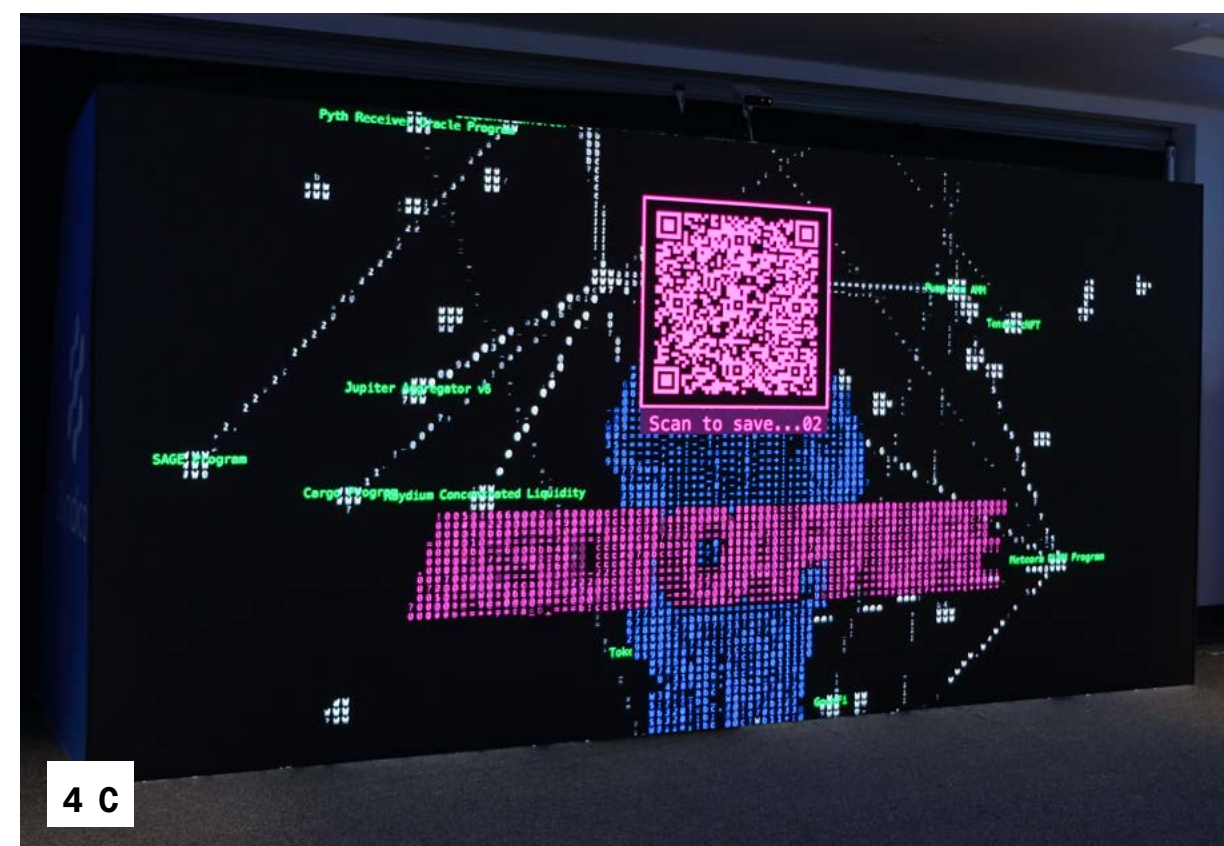

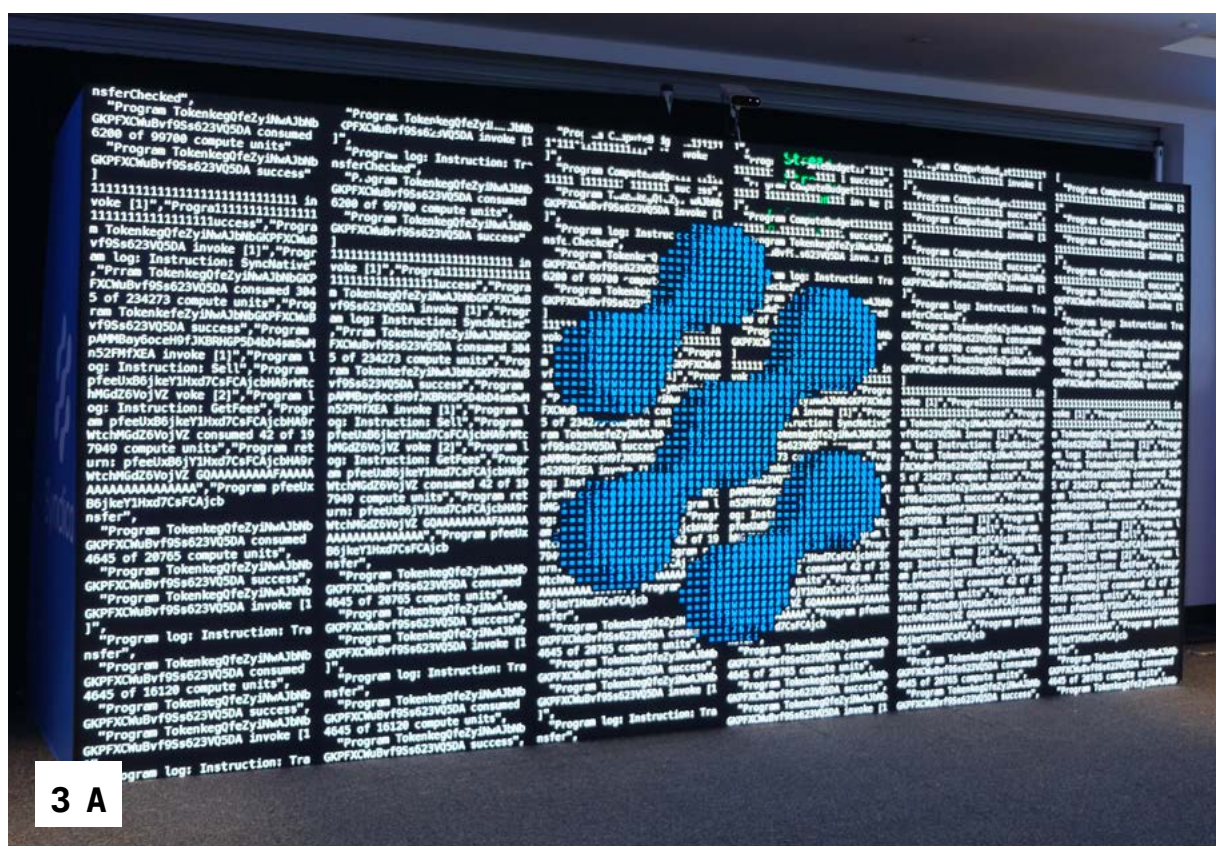

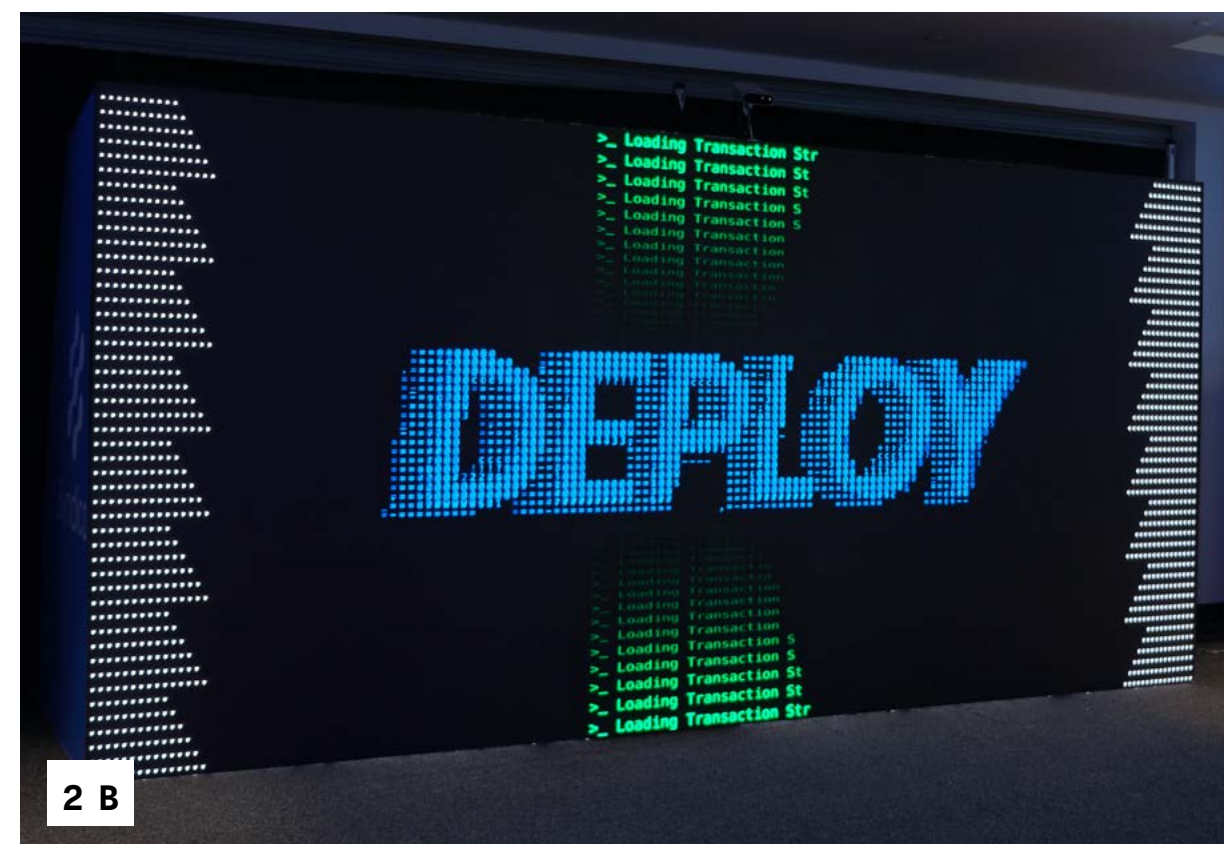

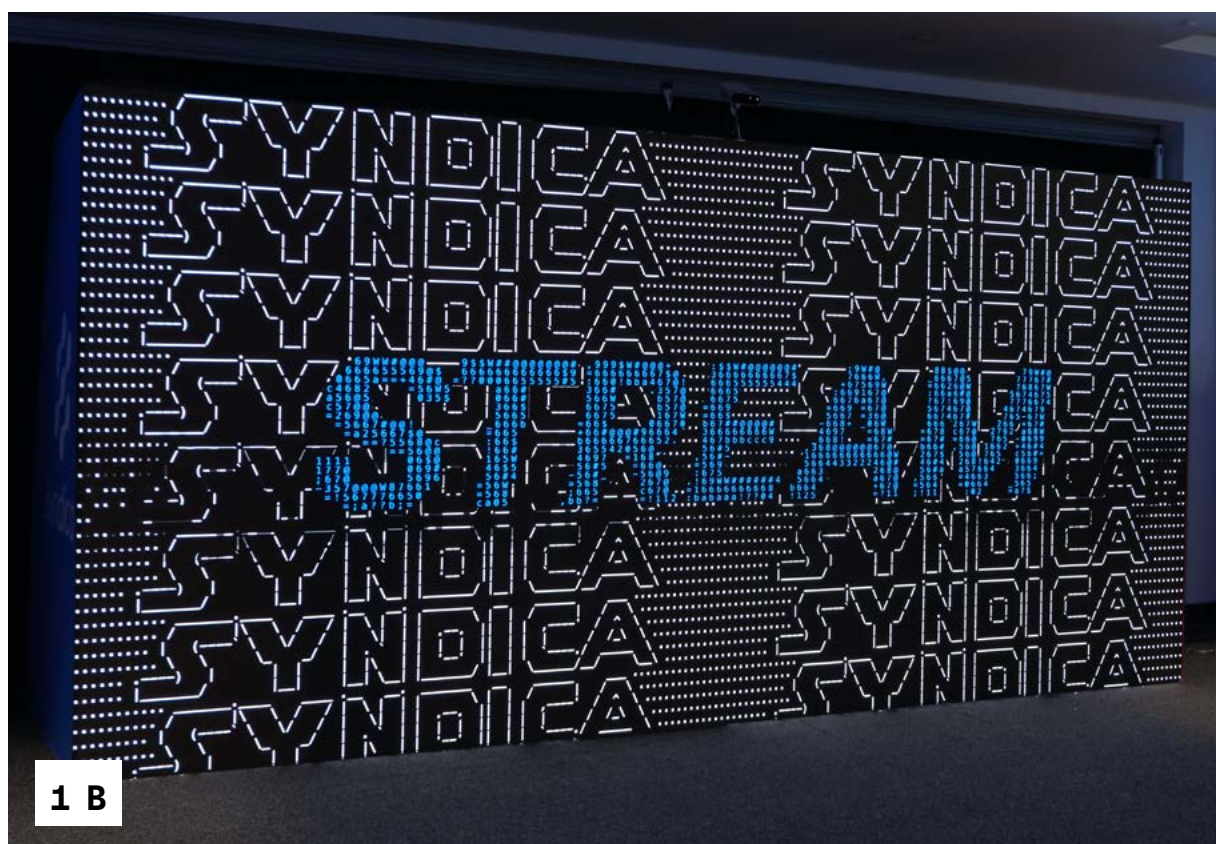

2 Layers. Background. Interactive.

Background layer:

- 1 SYNDICA in ASCII
- 2 Loading live transaction data
- 3 Raw live transaction data
- 4 Plexus visualisation of live transaction data

Interactive layer
(when not in use):

- A Rotating ASCII brand logo
- B 4 rotating brand action words
- C ASCII capture simulation

How we're going to do it...

Ambient Animation

Shimmering Harbour

Content

Showcase Sydney

Interactivity

Play + Explore

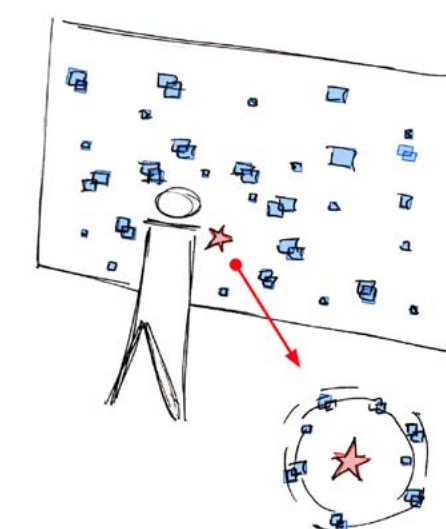

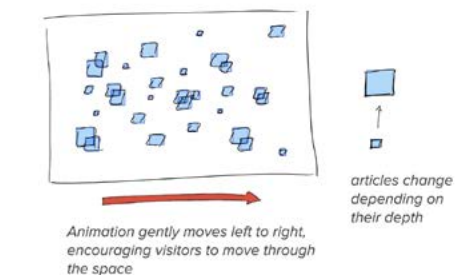

Personalisation

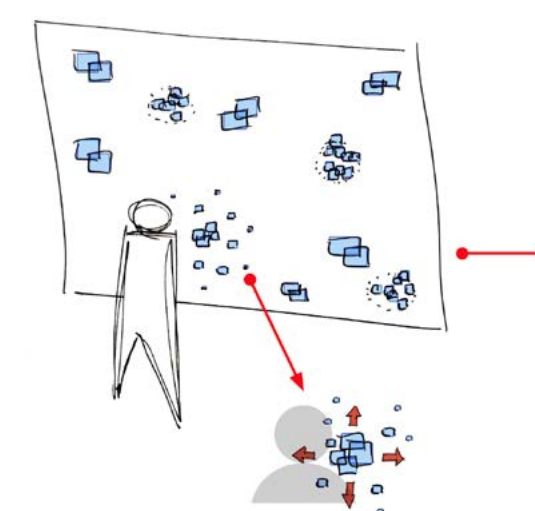

Welcome + Inform

The particles gently bob up and down as harbour waves, showing more content as they become larger and clearer. The waves have a subtle motion from left to right, encouraging visitors to continue to the event space.

Particle engine drives ambient animation & interactivity

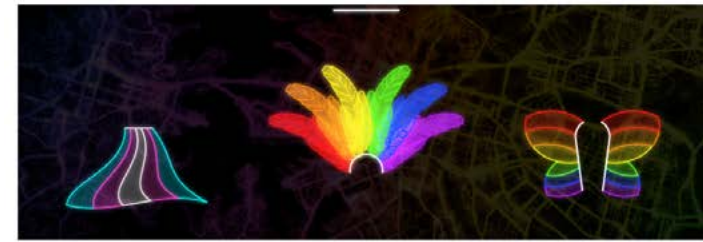

Your body creates a ripple in the rockpool, as you move around it follows you. You might be lucky enough to stumble across some marine life.

Hidden Rockpools

Once you begin interacting, hidden rockpools get created. As ambient waves and your ripples flow over the rockpools, particles get caught. From time to time a wave might come along and wash all the particles away, and create new rockpools in new locations.

Ripples follow your body as you move around the screen.

Rare Easter Egg

Only get triggered 10% of the time.

Rare Easter Egg

Only get triggered 10% of the time.

TRIGGERED BY INTERACTION

2 conditions

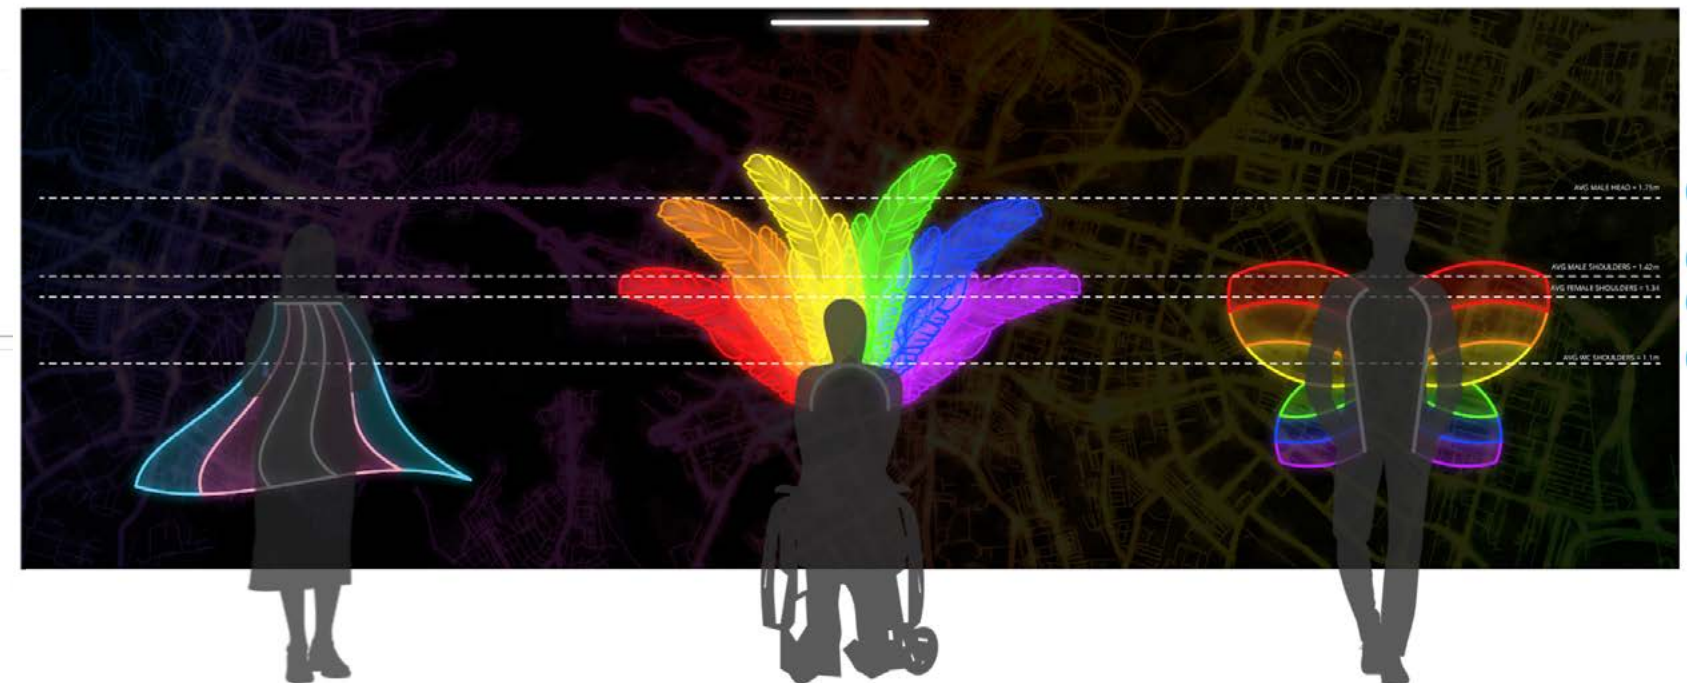

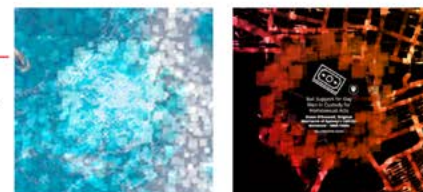

- User Interaction**
There is at least 1* person detected in front of each* third of the screen for 5* seconds, and
- Time Elapsed**
It has been at least 5* minutes since the last Easter Egg was triggered

TRIGGERED MANUALLY

The Easter Eggs can be triggered manually by a corresponding keyboard. 4 keys will be allocated to each Easter Egg in both themes, i.e. key "1" = Easter Egg "1" etc

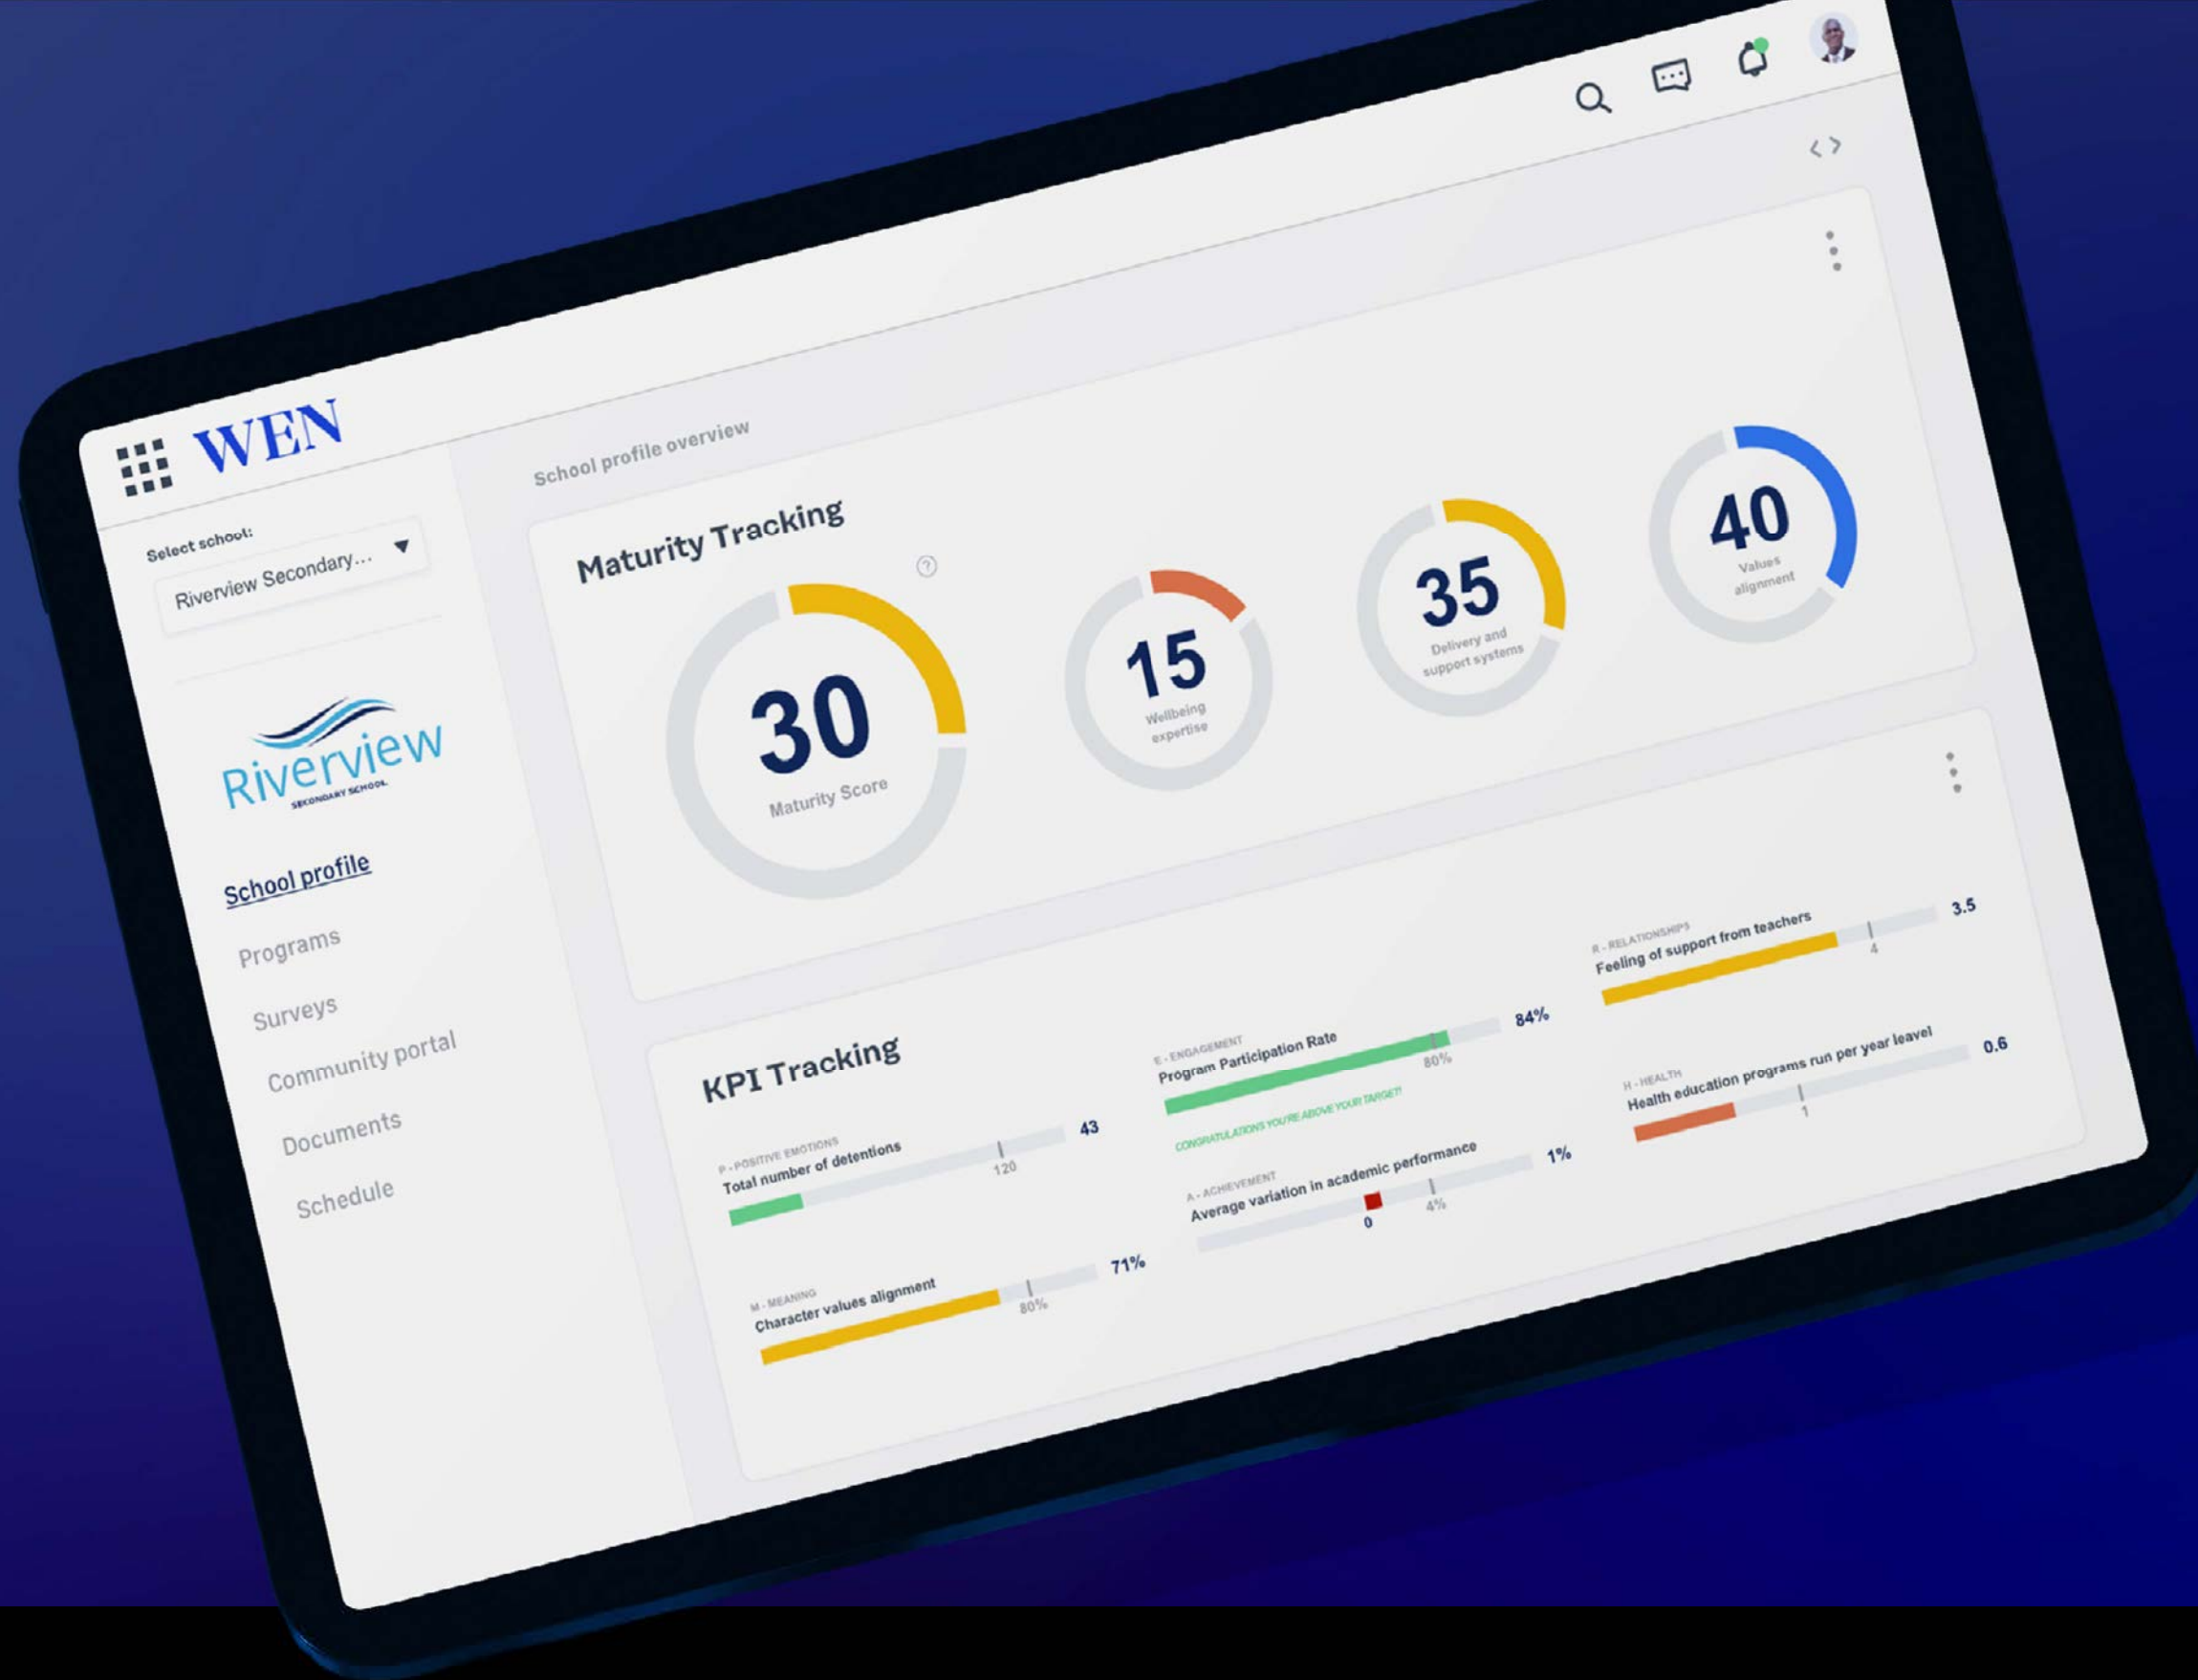

Attract Ripple
Visible feedback on the attract ripples when user enters the "Easter Egg" zone

Easter Eggs:
Surprise moments of delight.
User triggered animations.

» [watch the easter eggs \(design development\)](#)

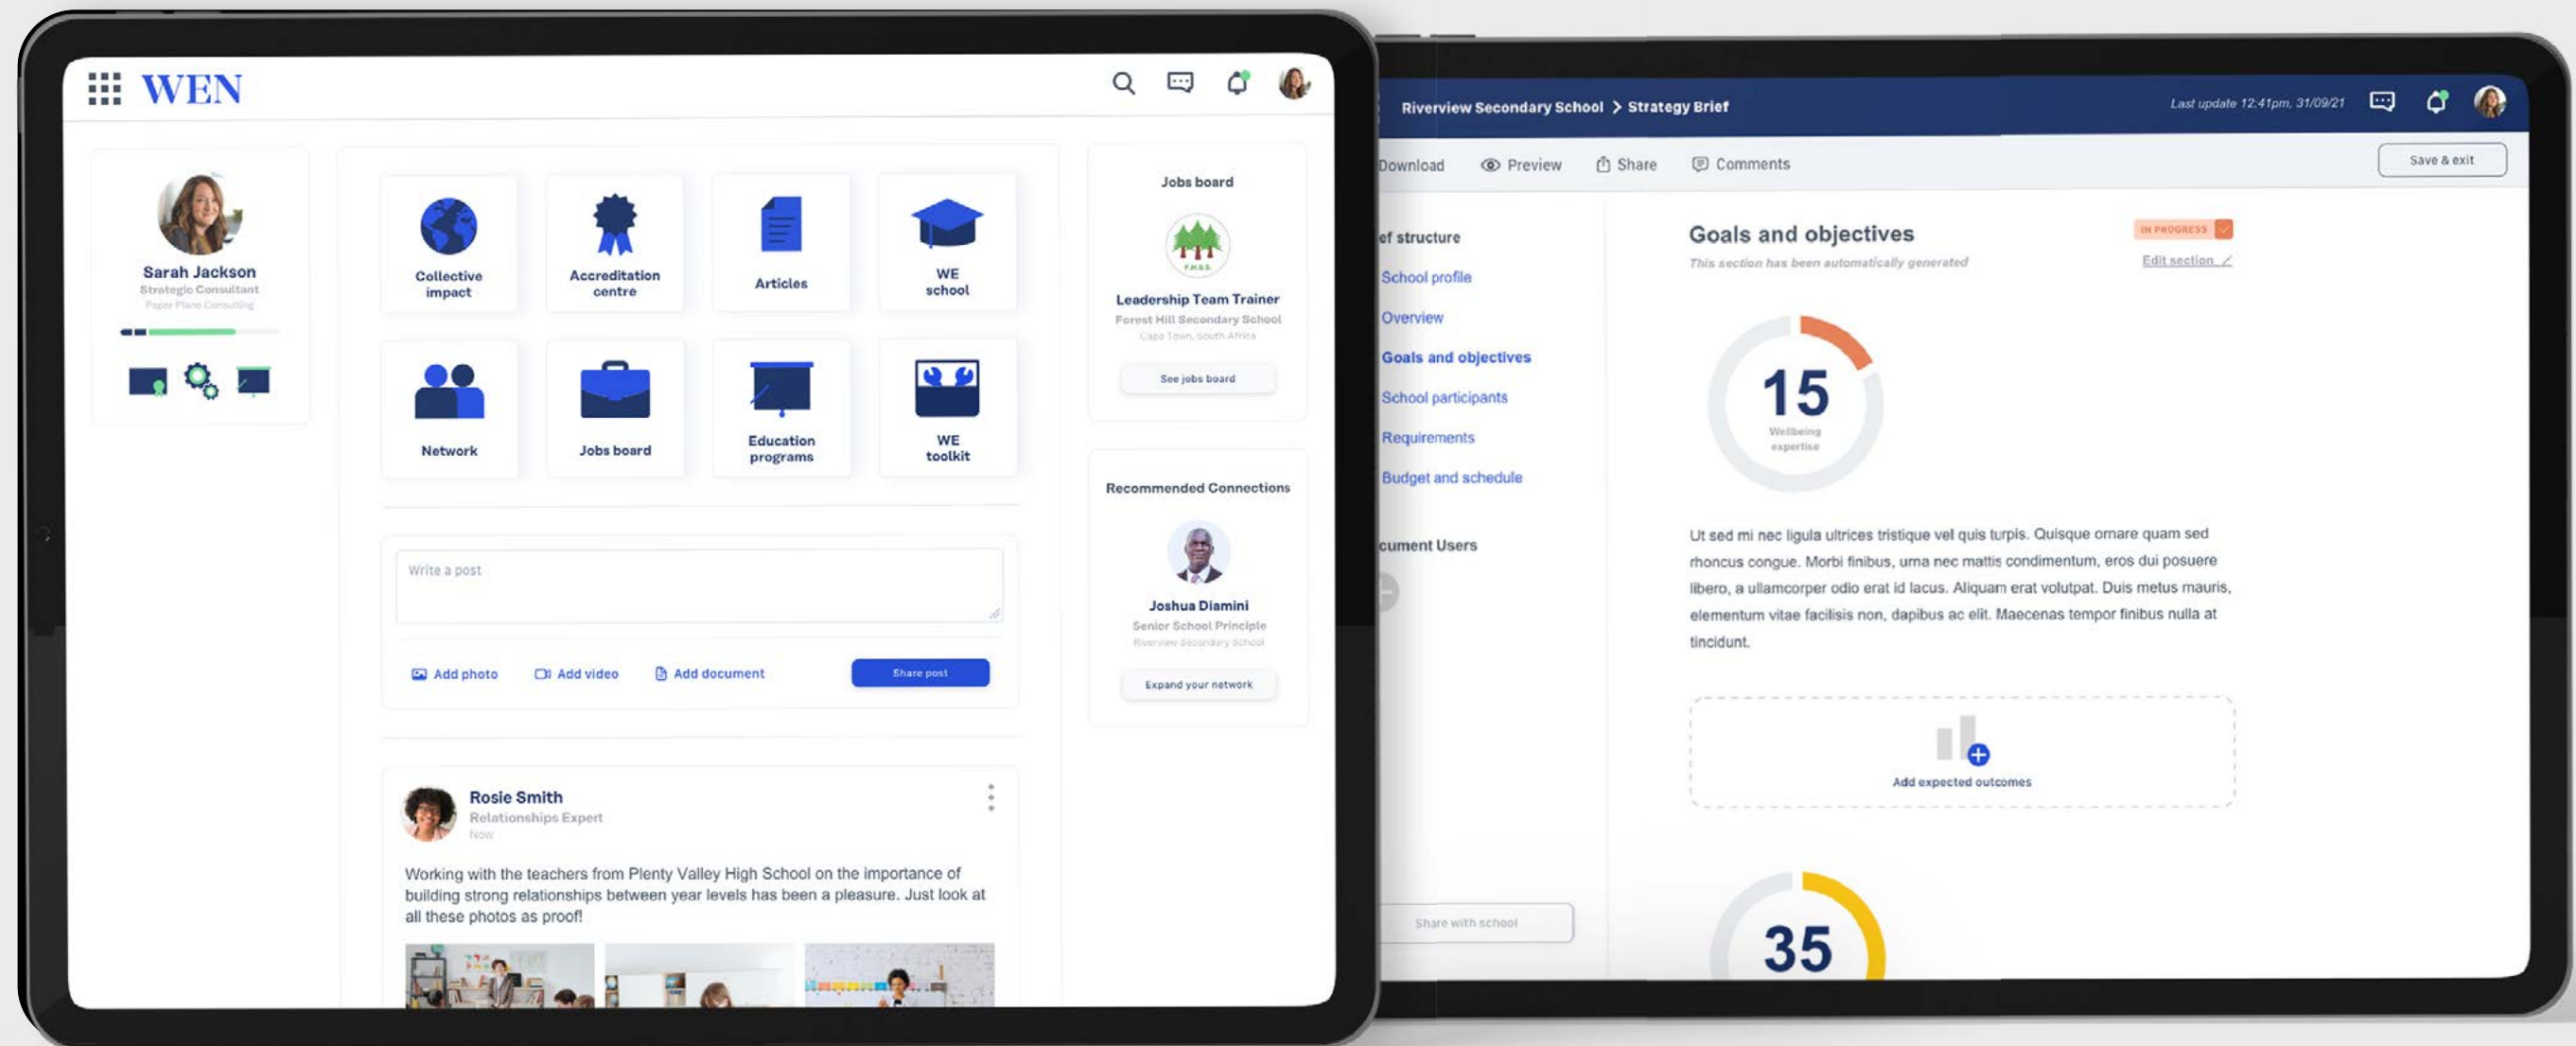

How might a global community of practice feel like a shared learning space for consultants, educators, students and their parents?

CLIENT:
WELLBEING EDUCATION NETWORK

PROJECT:
EDUCATION DEVELOPMENT PLATFORM

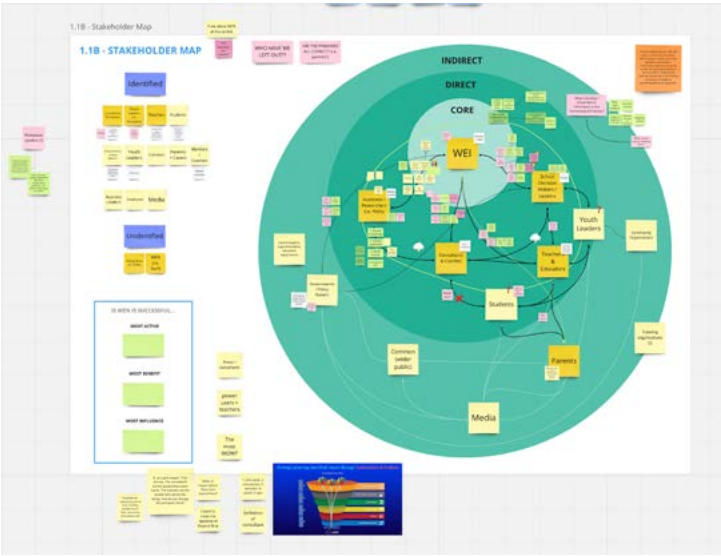

ROLE:
LEAD EXPERIENCE DESIGNER

UX/UI design concepts:
Visualising key features
and journey moments.

Experience Framework:
How the platform should
feel and function.

Stakeholder Mapping:
Community roles and
interactions.

1. Access

EASY TO FIND, EASY TO USE

What this is:
Frictionless pathways to information, support and action are the foundations of Plaza's customer experience. Experiences are inclusive, empathetic and approachable for people of all abilities, backgrounds, levels of WE literacy and preferred methods of learning.

Relevant accessibility standards are followed to support this.

- How this is evaluated:**
- Are the latest accessibility standards* met?Is
 - information accessible in as few clicks as possible?
 - Do users have enough control to support and define their best experience?

4. Reward

CELEBRATING ACHIEVEMENTS, SHARED PURPOSE & COLLECTIVE IMPACT

What this is:
Members are rewarded for community participation, task completion, milestone achievements and expertise / participation in WE program - these rewards could take the form of profile status scores / updates and animations.

On a collective level, the impact of WE programs across the global school community is shared and celebrated.

- How this is evaluated:**
- Do I feel good using the platform?
 - Am I encouraged to keep using the platform?
 - Do I feel like I'm making progress?
 - Do I feel like I'm part of something bigger?

2. Knowledge

RICH INFORMATION, TAILORED TO NEEDS

What this is:
Expertise, research and tools are delivered through multiple channels and in multiple forms, giving members the ability to constantly improve their understanding, practice and implementation of wellbeing education.

WEN has a deep understanding of their members' preferences, considerations and program efficacy giving them personalised impact reporting and content.

- How this is evaluated:**
- Are the users behaviours and preferences known, and used to tailor information?
 - Is the latest, best, most up-to-date information available?
 - Are multiple methods of knowledge transfer supported where appropriate?

3. Action

COLLABORATIVE, EMPOWERING

What this is:
Experiences are engaging and encourage a state of flow through a bias towards 'doing'. There are always clear actions to take that support member needs, goals, and build advocacy and community.

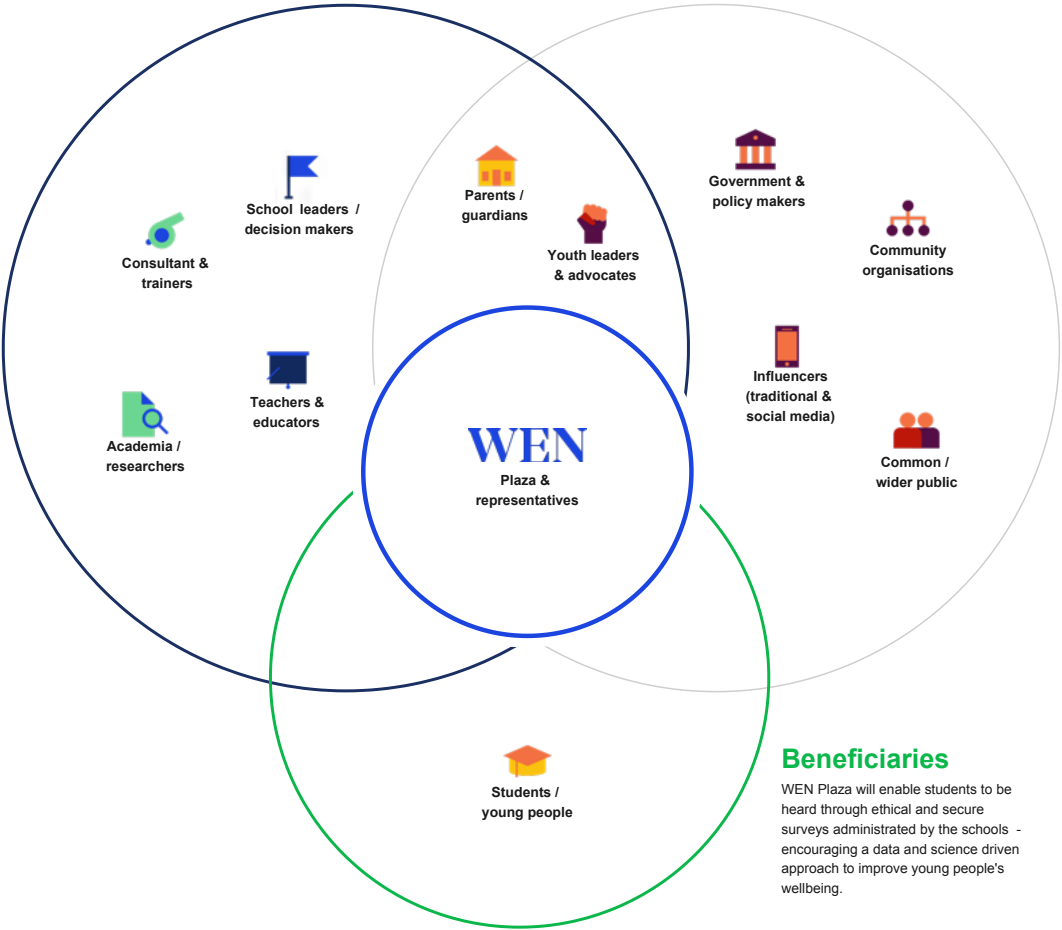

Actions are practical (participate, create, complete, download) and emotional (share, reflect, react, comment).

- How this is evaluated:**
- Is the user being encouraged to 'do' - i.e. participate, collaborate, co-create, advocate?Are
 - there appropriate practical actions provided to improve understanding or implementation?Are
 - there appropriate emotional actions provided to create and strengthen relationships?

Community of practice

Members of WEN Plaza connect and share expertise with each other, lifting their collective knowledge of wellbeing education and their ability to deliver effective wellbeing interventions in schools.

Change influencers

A global community of wellbeing education practitioners use WEN Plaza to advocate for system-level change - encouraging and supporting school leaders to initiate wellbeing programs in their schools.

Beneficiaries

WEN Plaza will enable students to be heard through ethical and secure surveys administered by the schools - encouraging a data and science driven approach to improve young people's wellbeing.

Sarah

Strategic Consultant

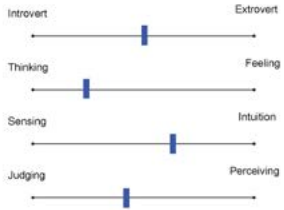

Age: 41
Gender: Female
Location: United States

About

Sarah is a consultant who specialises in wellbeing education for schools. She is passionate about creating change from the top that impacts throughout the entire culture of the school - from students and teachers to parents and contractors. To validate her work, Sarah wants to be able to have access to the latest science-backed resources, measurement tools and data visualisation so that she can deliver even more value to clients and grow her business opportunities. Due to covid, Sarah's job has become difficult to deliver in person and she wants to explore other channels to deliver meaningful and impactful wellbeing education services.

“

I want to deliver high quality wellbeing education that positively shapes schools, teachers and students in an efficient, effective and collaborative way, so that I can refine my practice and grow my business.

Member Persona - Consultant

Goals, Needs & Pain Points

Goals

Recognition & value of services

- Have WE widely practiced, implemented and advocated for in the school curriculum
- Clearly show the value of WE to school leaders and how it can be implemented into their school
- Improve engagement and sense of belonging of young people within the community
- Bring purpose and inner value to students' lives through their work
 - Have this validated through measurable outcomes (i.e. reduced absenteeism)
- WE advocacy to have a snowball/viral effect as a result of work with students, teachers and schools
 - WE is seen as a fundamental practice in life that gets passed down to future generations
 - Those who see the positive change in themselves and/or those close to them advocate strongly for its practice (i.e. parents see in children)
- Grow business and expand WE offering

Professional development & collaboration

- Work collaboratively with school leaders, teachers, other trainers/consultants and others who are invested in practicing WE
- Continue to grow professionally as new knowledge and practices from trusted sources become available

Delivery of services

- Provide high quality training, knowledge transfer and support to teachers (and school leaders) that creates/supports holistic change in schools (e.g. mindset, behaviour, culture)
- Create a sustainable engagement model, i.e. ability for teachers to take ownership of WE with feedback loops to support maintenance and growth
- Explore new opportunities around how to deliver trainings and share content (i.e. rich media education)

Needs

Recognition & value of services

- Be recognised for providing quality and assured services, above those who don't have the same level of qualification, knowledge or practice
- Be widely recognised in their community through their level of contribution in the WE community
- Be endorsed by clients (school leaders and teachers) for the quality of services they offer
- Have IP protected and appropriately valued
- Business brand needs to be visible and prominent when providing services

Professional development & collaboration

- Access to the latest science-backed WE trainings, resources and tools to improve their practices
- Efficiently share, discuss and collaborate over the latest science-backed WE resources & practices, in a supportive culture with whole WE community (from trainers/consultants and researchers to school leaders and teachers)
- Utilise social networks and events to connect with the whole WE community as an extension of their professional practice

Delivery of services

- Easily connect with potential clients who are seeking services, and other consultants and trainers in the delivery of services
- Clearly & easily understand the level of WE maturity in a school
 - what programs, if any, have they already implemented and what were the results
 - Efficiently understand, address and scope school's brief / needs (i.e. KPIs from leaders & staff to students)
 - Efficiently and accurately measure their work - see the results and impacts
 - Efficiently translate the results of their work into a visual form that can be discussed with school leaders and teachers

Pain points

Recognition & value of services

- Lack of client understanding of WE
- Difficulty in engaging with communities and people who do not have an understanding of WE and how it is beneficial
- Lack of access to scientific evidence that connects WE in schools with healthy, happy humans, who are engaged in their community and perform well academically
- 'Cowboys', who are unqualified to be providing services, are giving the industry and practice a bad name
- Difficulty demonstrating value of services in comparison of other consultants and trainers
- Difficult generating leads and signing up clients

Professional development & collaboration

- Lack of formal opportunities and access to industry specific personal development outside of formal degrees
- Lack of modern and consultant focussed professional, industry organisations to share and collaborate with other WE professionals

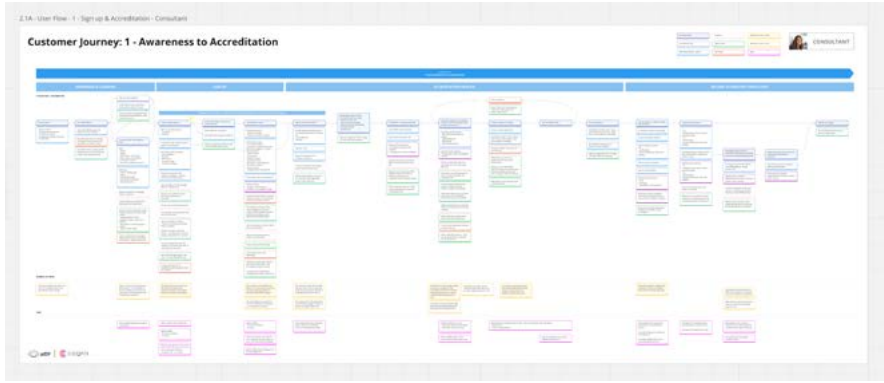

Delivery of services

- New potential clients, who are new to WE, require a level of awareness and education on WE
- When engaging new clients it can be difficult to define scope and outcomes that connect directly to their KPIs
- Gaps in feedback and evaluation tools makes it hard to showcase evidence of their services' impact
- Creating data analysis outputs is not trainers/consultants' specialty and is highly time consuming
- Lack of platform to connect with other consultants who have different skillsets in order to meet specific clients' needs.

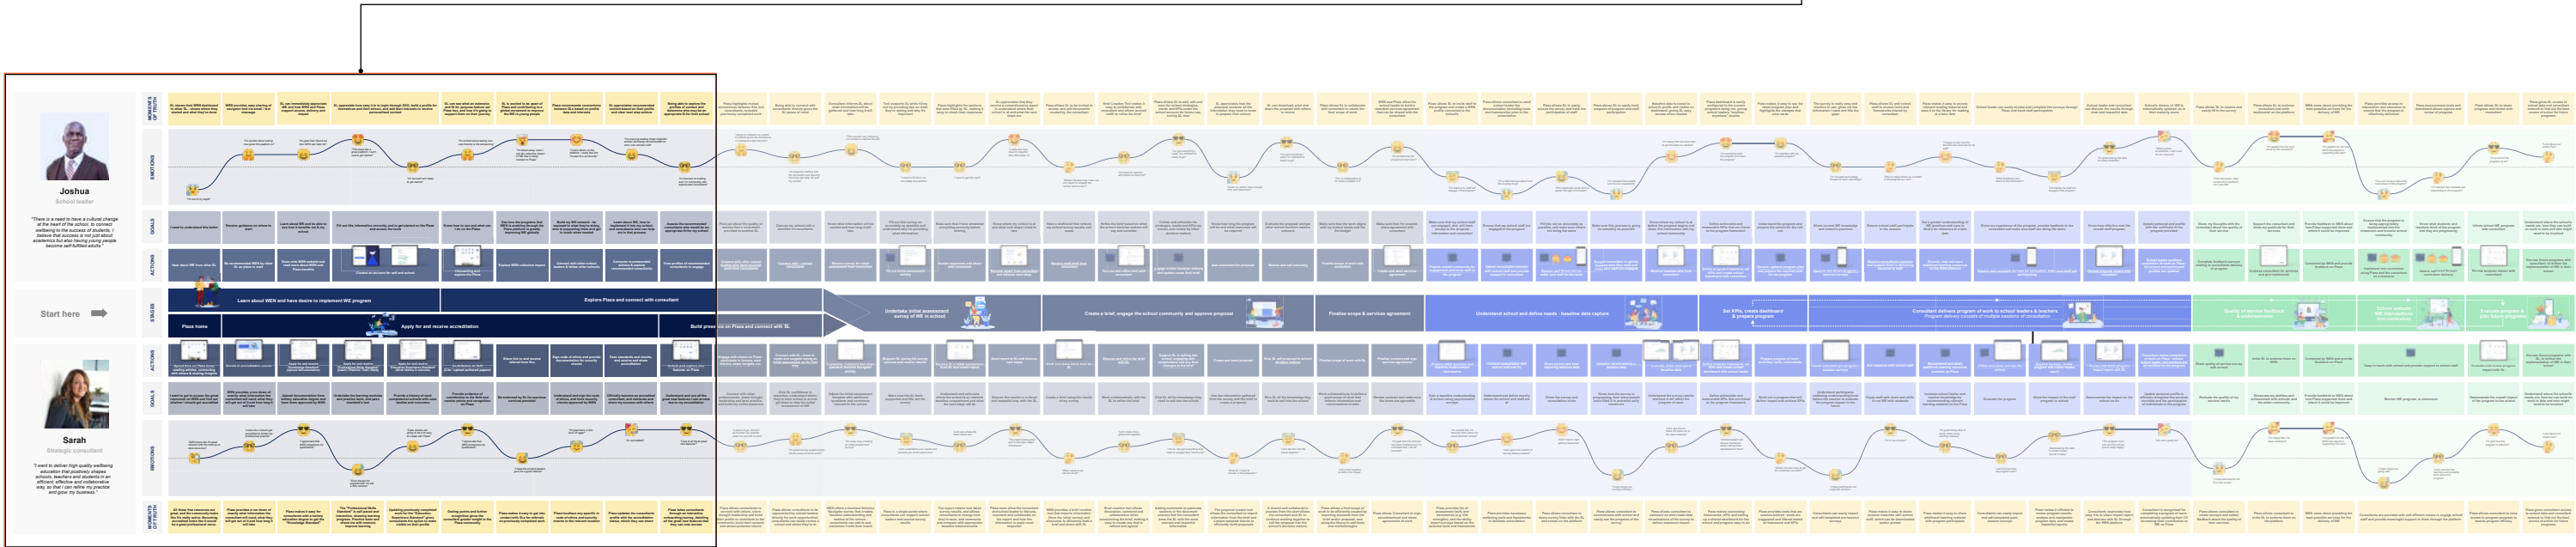

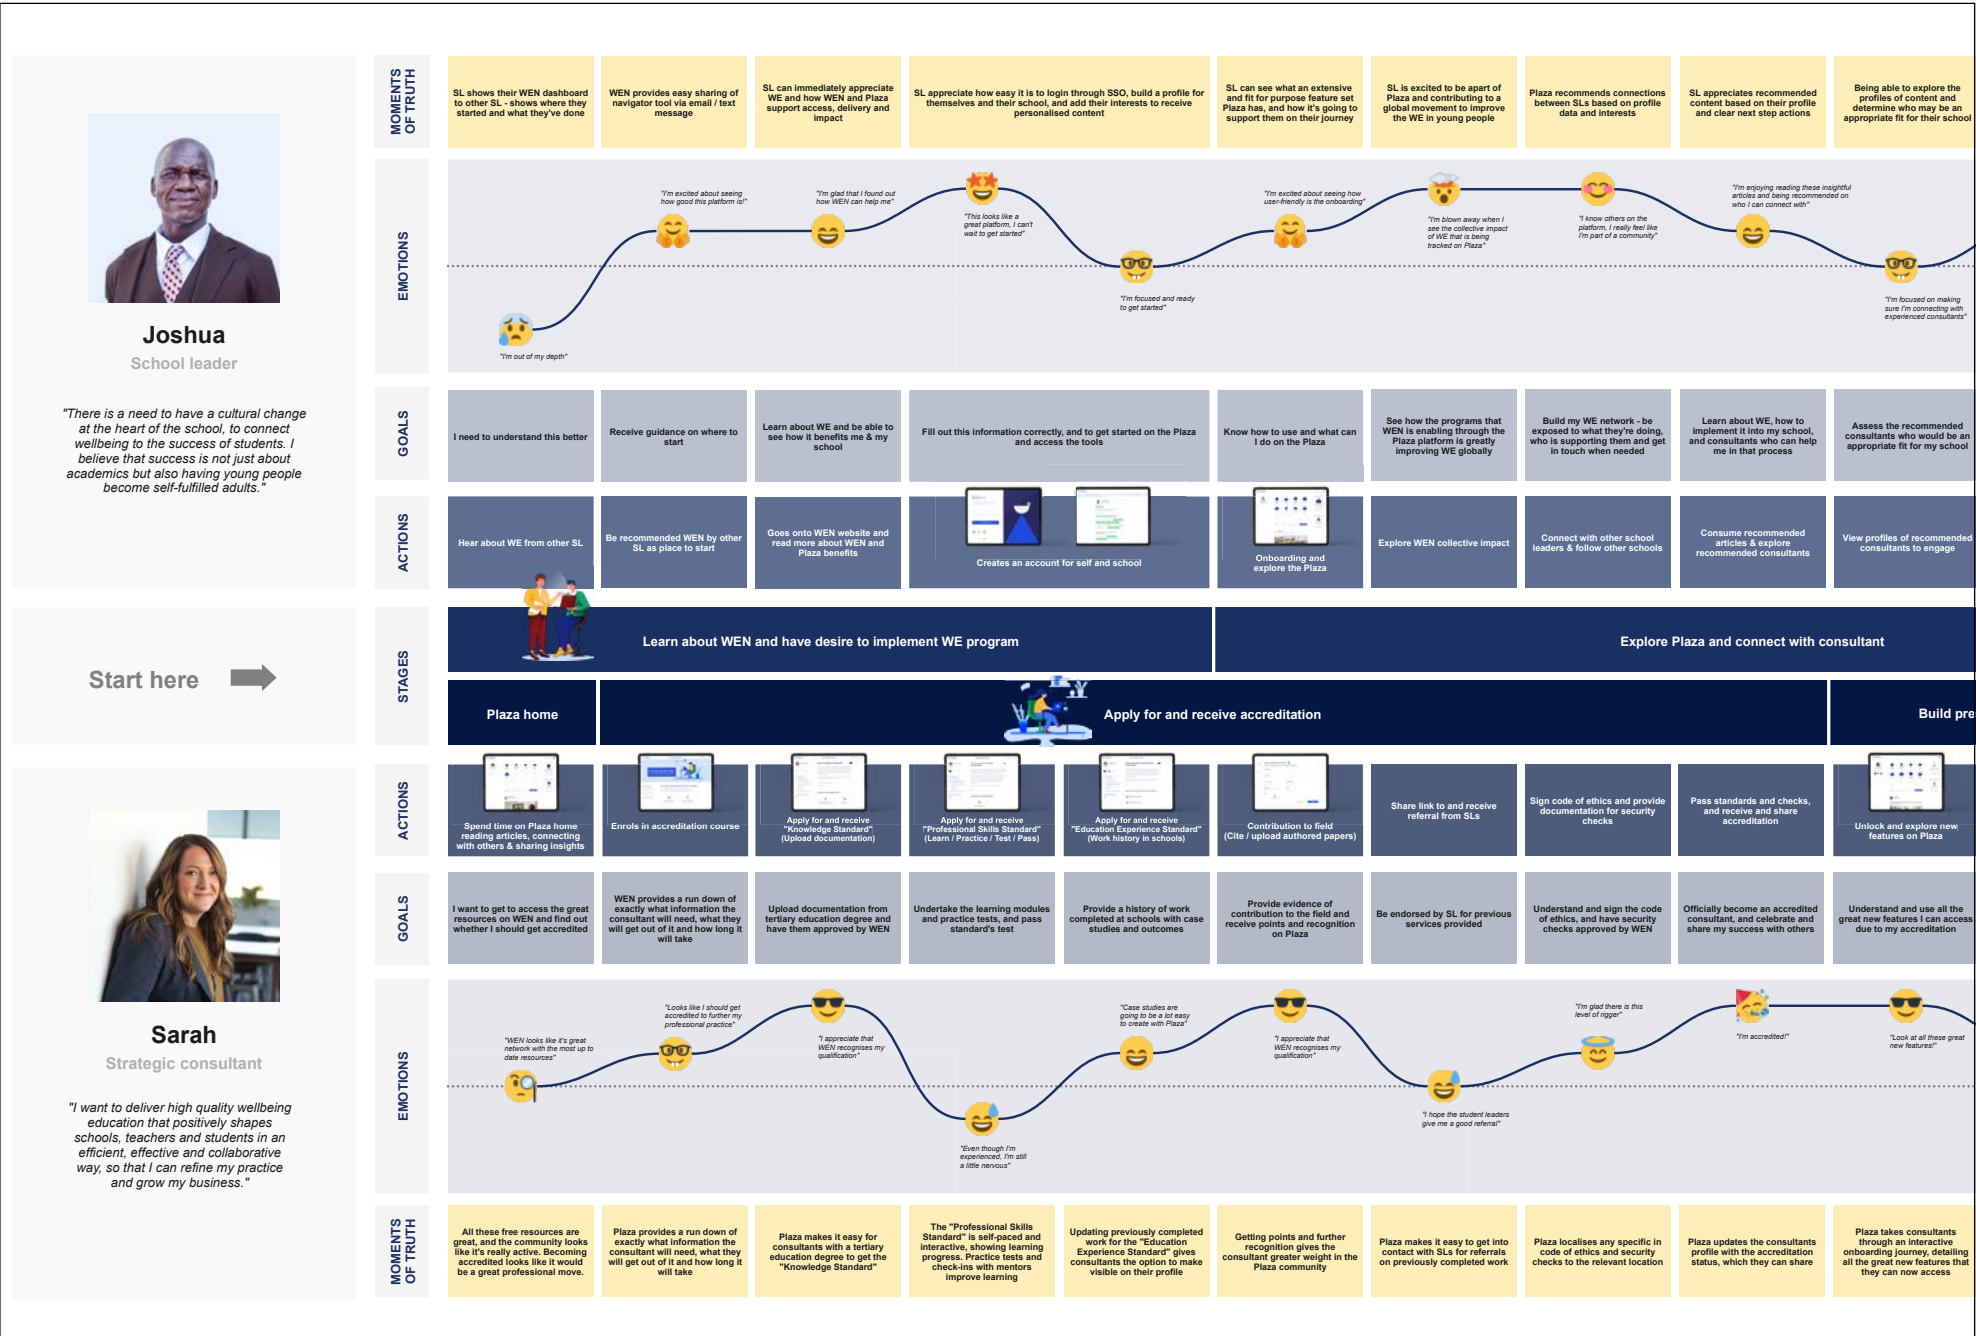

Member Persona - Consultant				 			
Problem Statements: User Stories							
ADVANCING EDUCATION - BEING AN INDUSTRY LEADER							
As a consultant	...I WANT TO...	receive industry accepted, formal recognition for my knowledge and services offered	...SO I CAN...	set and example for the quality of service that should be offered, create trust for prospective clients and a point of difference for those who don't hold the field in the same high regard.			
As a consultant	...I WANT TO...	be recognised for my contributions to a community and its body of knowledge	...SO I CAN...	feel part of a broader community, valued by my peers, industry and clients, and have people come to me for answers and information on particular topics.			
ACCESS TO CLIENTS, JOBS, EMPLOYMENT							
As a consultant	...I WANT TO...	see, attract and connect with clients over potential service opportunities	...SO I CAN...	focus more on the delivery of good services, and less on trying to find new work and connections.			
As a consultant	...I WANT TO...	see job opportunities from a dedicated and reliable source that are personalised to me	...SO I CAN...	find work/employment, get industry experience and grow my network.			
SCOPING, SELLING & AGREEMENT OF SERVICES							
As a consultant	...I WANT TO...	easily understand the needs, goals, objectives and culturally significant aspects of a potential client	...SO I CAN...	efficiently create, tailor and provide a scope of work, and how impact and outcomes of that scope will be validated and measured - what measurement tools I need for the job.			
As a consultant	...I WANT TO...	know what previous WE services a school has received and who provided them	...SO I CAN...	understand the context of the services required, how I might need to tailor my services, and conversation, what the impact of the past services were/are and allow me to speak to those that provided them.			
DELIVERY OF SERVICES & MEASUREMENT OF IMPACT							
As a consultant	...I WANT TO...	access the latest science-based WE assessment and measurement tools, and ways to show their outcomes through data visualisation	...SO I CAN...	efficiently and consistently capture data, show the outcomes in engaging and high impact ways. I will want to show these outcomes to the client, as a case study to other prospective clients and at conferences.			
As a consultant	...I WANT TO...	engage schools over an extended period of time, by continuing to tailor and monitor the effectiveness of strategies and implementation	...SO I CAN...	retain clients, refine my practices and see the long-term impact of my work.			
As a consultant	...I WANT TO...	be able to share my services in engaging and future-forward ways that don't necessarily require me to service a client or provide training in person	...SO I CAN...	be more flexible with my working arrangements, reach a greater audiences, and grow my business and network.			
As a consultant	...I WANT TO...	make my brand visible when delivering consulting and training services across all appropriate touchpoints	...SO I CAN...	grow the recognition of my practice and services.			
PROFESSIONAL DEVELOPMENT & COLLABORATION							
As a consultant	...I WANT TO...	undertake high-quality personal development from industry leaders	...SO I CAN...	deepen and/or expand my knowledge in practices/fields, AND be recognised for undertaking further education & professional development.			
As a consultant	...I WANT TO...	access the latest research and thinking	...SO I CAN...	deepen my knowledge in targeted practices/fields, and/or expand my knowledge into new practices/fields.			
As a consultant	...I WANT TO...	connect with experts & other consultants over specific research, topics of discussion and best practice	...SO I CAN...	have a centralised place for collaboration with the people who are most engaged and/or the experts for those areas.			
As a consultant	...I WANT TO...	be notified when new research or information becomes available based on my needs, preferences and how I've interacted with the platform	...SO I CAN...	have information delivered straight to me without having to go and find it myself.			
INTELLECTUAL PROPERTY							
As a consultant	...I WANT TO...	share and be rewarded for the intellectual property that I create and ensure that no one can use it in ways that I don't see fit	...SO I CAN...	financially and intellectually protect my hard work.			
SOCIAL							
As a consultant	...I WANT TO...	be able to connect with other consultants and people interested in WE, in settings and through channels that are more social	...SO I CAN...	make friends and better connections, globally.
