Your body creates a ripple in the rockpool, as you move around it follows you. You might be lucky enough to stumble across some marine life.

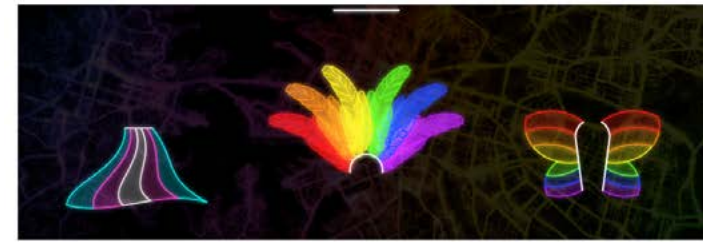

Ripples follow your body as you move around the screen.

Hidden Rockpools

Once you begin interacting, hidden rockpools get created. As ambient waves and your ripples flow over the rockpools, particles get caught. From time to time a wave might come along and wash all the particles away, and create new rockpools in new locations.
